

Special Pricing for the Delta Dental PPO™ Network

According to the National Institute of Dental and Craniofacial Research, Americans between the ages of 50 and 64 will lose on average as many as six teeth (not including wisdom teeth).¹ The first choice and standard of care to restore these missing teeth are dental implants. There are many reasons for this choice:

- Strong and stable, a dental implant restores a lost tooth so that it looks, feels, fits and functions like a natural tooth.
- Dental implants are a long-term solution—traditional restorations can last anywhere from five to 10 years, while dental implants can last a lifetime.
- Protecting healthy bone, dental implants are the only dental restoration that preserves and stimulates natural bone, actually helping to stimulate bone growth and prevent bone loss.

At Dental Design Studios, we have highly seasoned technicians who will personally work with you throughout every step of the implant process. From evaluating the transfer impression, soft tissue model, ordering implant parts to crown fabrication, our technicians will be here at every step offering you the personalized care you deserve.

Because you are part of the Delta Dental PPO network, you can take advantage of exclusive savings that can be applied to your whole patient base.

\$60 OFF YOUR FIRST IMPLANT CASE!*

Shipping included both ways

**Offer valid through 4/30/2022*
