

Special Pricing for Delta Dental Providers

According to the American Academy of Implant Dentistry, it is estimated that 69 percent of Americans ages 35 to 44 have at least one missing tooth.¹ Dental implants are the first choice and standard of care to restore these missing teeth. This choice has many reasons:

- Strong and stable, a dental implant restores a lost tooth so that it looks, feels, fits and functions like a natural tooth.
- Dental implants are a long-term solution—traditional restorations can last anywhere from five to 10 years, while dental implants can last a lifetime.
- Protecting healthy bone, dental implants are the only dental restoration that preserves and stimulates natural bone, helping to stimulate bone growth and prevent bone loss.

At Dental Design Studios, we have highly seasoned technicians who will personally work with you throughout every step of the implant process. From evaluating the transfer impression, soft tissue model, ordering implant parts to crown fabrication, our technicians will be here at every step offering you the personalized care you deserve.

Because you are part of the Delta Dental network, you can take advantage of exclusive savings that can be applied to your whole patient base.

\$50 OFF YOUR FIRST IMPLANT CASE!*

Shipping included both ways
