

# Just In Time For The New Year!

## January 2022 Special

A smile changes everything; we want to be a part of enhancing your patients' smiles.

### Implant Special

**\$50**

- Shoulder preparation not needed, feathered edge is OK. It is a conservative prep similar to full-cast gold, so any prep with at least 0.5 mm of occlusal space is adequate.
- Minimum occlusal reduction of 0.5 mm; 1.0 mm is ideal.
- Resin-reinforced glass ionomer cement.

**\*Offer valid through 1/31/2022**

### Porcelain Fused to Zirconia Single Unit Crown\*

**\$99**

- Unlike metal PFM's, PFZ allow more light to pass through, and this makes them more suitable for anterior teeth.
- Zirconia does not produce any chemical reaction in the mouth, ZrO<sub>2</sub> is biocompatible. This is important as metal can cause allergic reactions once placed in the mouth.
- Zirconia when fused with porcelain is stronger than any other material, including gold.
- PFZ is less likely to fracture as compared to porcelain fused to metal.

**\*Offer valid through 1/31/2022**

Call Tabitha Hans at **734-838-0181** for your **free starter kit**, and begin **increasing** your profits and **decreasing** your practice overhead!
