

JORDAN BUSH

Jordan Bush is the co-founder and CEO of TGFB Media, which exists to help people (especially Christians) understand and use Bitcoin for the glory of God and the good of people everywhere.

Before founding TGFB Media, Jordan served as a missionary and pastor in Montevideo, Uruguay, where he saw firsthand the disastrous consequences that fiat currency and central banking have produced in many Latin American countries and around the world as well. Half of the congregants in his church in Uruguay were Venezuelan immigrants who were forced to flee and seek employment in neighboring nations due to governmental corruption and monetary policies enacted over the course of 30 years that hyper-inflated their currency to the point of becoming worthless. He sees Bitcoin as a timely tool, both to give normal people the ability to opt out of being forced to denominate their lives in a currency that is increasingly less scarce and valuable than the work and time given in exchange for it and as a means to overcome censorship, whether political, religious, or otherwise.

He helped author 'Thank God For Bitcoin: The Creation, Corruption, and Redemption of Money' and hosts the **Thank God For Bitcoin** and **Thank God for Nostr** podcasts.
