

Surviving as the hostage at Malibu Park

urgent release of
VOLUME 3 of the sequel, based of the
facts of Police report for
THE INCIDENT # LHS0191 July 5, 2025 Malibu

Biographicals

by Rozalina Gutman

▲ **Part 4**

**Survivor's Guide for grandchildren of
today's adults, incapable of parental
love and defense from toxic
conveniences during
COUNTDOWN2045**

This book serves as author's

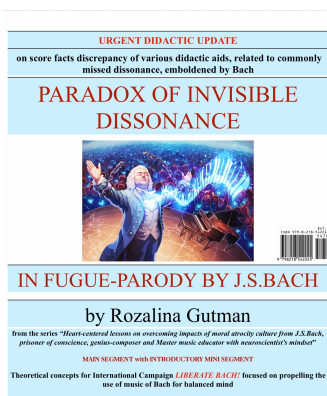

Rozalina Gutman's **urgent and desperate S.O.S. call for rescue and help as well as the urgent warning about collective Blindspot for priorities, clarified through perspective of the Battle of Mindsets:**

**Primitive, shallow and hostile in yearning for dominance at any cost, hiding under
the manipulative mask of civility,**

VS

**Integrative, egalitarian and capable of grasping complexities of interconnectedness
of our Universe, earned through rigorous self growth practice**

Rozalina Gutman also recently released her new ebook
**PARADOX OF INVISIBLE DISSONANCE IN
FUGUE-PARODY BY J.S.BACH,
providing TEXTBOOK CHANGING
DIDACTIC UPDATE**

**on flawed didactic aids on Bach's legacy &
observed evidence for the textbook changing sensory
augmented data for the deeper understanding of the
psychological drivers of inner mechanisms of SELF-
DEFEAT patterns, driven by maladaptive subliminal
conformity to *groupthink (Asch Effect)*, *authority pressure
(Milgram Effect)*, *culture of moral atrocity (Lucifer Effect)* -
the music-embodied observations and depth-reflection, that provided the
framework for grasping the root cause for complicity to preventable
environmental toxins & *priority* to avoid them - **DEACTIVATED PAIN
ALARMS TO TOXICITY****

Table of contents

We are grateful to the celebrities and influencers, who support under-publicized good causes, advocated by Rozalina Gutman include

Conductor Gustavo Dudamel,
Psychology researcher, best selling author, who coined term "Flow" Mihalyi Csikszentmihalyi (Prof. Flow),
renown producer Quincy Jones,
conductor and pianist Vladimir Ashkenazy,
renown pianists Emanuel Ax and Mark Andre Hamelin,
best selling self growth author Deepak Chopra,
VP of Music/Arts Committee of China Education Ministry Ms. Yan Ruimin,
President and CEO of Commonwealth Club of SF, Dr. Gloria Duffy
Honorable Speaker of the USA House Nancy Pelosi,
singer and conductor Bobby McFerrin,
violinist and conductor Vladimir Spivakov,
Russian ballet dancer/choreographer/producer Mikhail Baryshnikov, etc.
among many others - visit now and again for updates www.CHARISMAfoundarion.org

*Get inspired by masterfully performed by Rozalina Gutman one of the
most challenging pieces in piano literature - "Revolutionary" Etude in
dis by Scriabin*

PART 4

▲ Volume 3 of *Biographical* is the Illustration of Bach-inspired insights for intervention for moral atrocity culture, in the context of the global solution for overcoming retaliatory cognitive dissonance, in the face of resentment to change, dictated by COUNTDOWN2045

The above image of my medical bracelet has my diagnosis, that had been documented by the rare expert MD and any reasonably minded medical professional would treat this very important for my health and my life information as the well regarded guide for providing the best possible care in case in case I need medical attention. Why would an inept nurse, who never heard of such medical issues, as MCS would take the risk to override this expert opinion, if she known of my high vulnerability, including heart attack history and resurgence of symptoms every time I get exposed to toxicity?

How could such blunt disrespect to the sanctity of the human life dominate the mind of the reasonable medic, leaving no room for the attitude of "DO NO HARM!" ?

But instead the message of care, my medical records carry the message of clear and notorious message to ridicule my severe MCS illness and call for hostility from the individuals who are clueless about the corruption behind the fraud, that was not corrected even after many efforts had been taken to help understand the issue. And such shockingly dangerous pattern had been ruling my life, driven by terrifying intentional cruelty.

While trying to avoid any conflicts in my already challenging by illness life, I have tried on and on to to find the answer to the inexplicable hostility from people, whom I have trusted to handle the issues of the existential importance according to their job description... But the forces of consonance dissonance had overpowered their morals and professional ethics, prioritizing odd matters over patient's health.

At times I think that Denzel Washington and the popular artist Mark Wooding were right saying: "Some people will never like you because your spirit irritates their demons"... But more often I think such horror stories about corruption in the medical field had turned into the widespread trend, since this story of trying to survive the retaliation to my unknown illness sadly is not the only one in my life, consuming my existence with the plots for sinister Comedy of Absurd... (And more of them are to follow in my upcoming Biographicals, so the lessons could be learned from pain. And this had been the key reason for my perseverance...)

In my recent ebook with didactic update “ PARADOX OF INVISIBLE DISSONANCE IN FUGUE-PARODY BY J.S. BACH” I referred to this deeply esteemed in all parts of the world composer in the rather uncommon for current textbooks way, calling him “MASTER MUSIC EDUCATOR WITH NEUROSCIENTIST’S MINDSET”. My choice of such uncommon definition is due to my reverence and admiration for rediscovered and yet to be included into all textbooks ingenuity of his in the effective didactic solutions for yet to be fully explored achievements in the realm, that is beyond musical

technicalities – in the area, that is still innovative today: The applied use of Music for transformative purposes of embodied through music self reflection and self growth.

After the section dedicated to the examination of staggering evidence for the collective Blindspot of significant discrepancies of many didactic aids with the self-explanatory and indisputable facts of his score of Fugue-Parody, that was paradoxically left undetected by many renowned musicologists and celebrity interpreters, I discussed in detail related and also missed in plain sight manner of the applied use of this tiny didactic piece, as the intended by Bach very effective tool for teaching the skills for using self deprecating humor for self reflection on admitting and correcting errors without

paralysis of resentment to change and for resolution of underlying cognitive dissonance, that is otherwise hard to grasp and address. But with the use of fun musical metaphors, such complex task can be made manageable, as well as fun, since it allows for breaking down the snowball of feelings often linked to overcompensation from childhood developmental trauma, that are otherwise intangible and thus, challenging to grasp, while leading to self defeat and harm to others.

And, in the context of the observed conspiring schemes between involved public service agencies, involved into vicious retaliation to the global and local demand to begin addressing the long overdue issues of the rapidly unfolding global threat of environmental illnesses pandemic, the opportunity for the effective reflection on the fear of change that is at the the core of the hurtful retaliation to the mind shift from environmental insanity mindset, allows for learning of the effective intervention strategy for otherwise unmanageable **Fight or Flight instinct**. And such potential of learning the skills for achieving emotional freedom, thanks to Bach’s outstanding mastery, can be appreciated by every user of the human brain, effected indiscriminately by irrelevant to the reality reactions - irrespective of education, profession, social status, cultural background. From misfirings of the brain of high school dropout in juvenile facility to the self conflicting dictator in the position to rule the large country, to neuroscience professor avoiding the challenging research on inconvenient truth with global impacts, everyone could benefit from such self mastery by gaining this capacity to disarm the inner demons of self defeating and harmful fear, enabling the elevation of moral values. This effective tool for intervention with the formation of the culture of moral atrocity, capable of corrupting into the acts of incivility many people, can allow solutions for

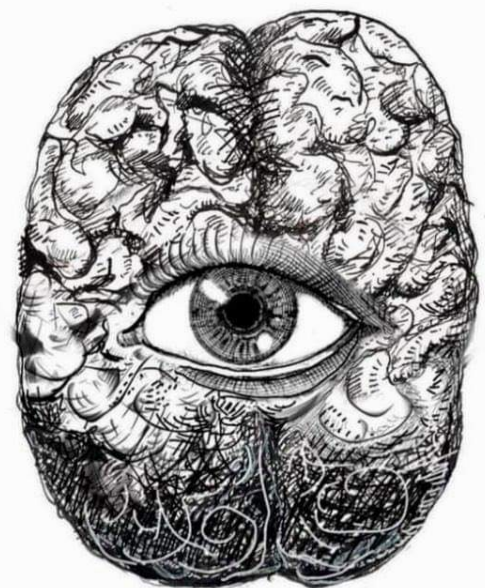

precisely thought as unsolvable problem of the unconscious mind that derails myriads of interpersonal interactions in personal, social and business interactions and drains incredible amount of mental energy for recovery from the caused damages to many people.

My strive to share my empowering discovery of how Bach used intuitively the power of musical humor for breaking paralysis (the state of Fright in Fight or Flight instinct) that is capable to immobilize frontal and prefrontal lobes, disabling logic and problem solving capacities, as the result of the **powerful reaction of adrenaline, was based on the additional knowledge of mine about the doubled dopaminergic power of musical joke to interfere with neurochemicals of stress**, and instantly help achieve the result of healing and letting go of the pathological state of mind, that is evidently dangerous when it is allowed to occupy the authority chair while under the impunity for public servants - as my own life experience helps to demonstrate from the position of insider:

The terrible normality in our life of the unconstitutional impunity for crimes and misconduct to public servants of various ranks gives to the primitive mind of a gardener in the position of city park supervisor an upper hand over the fate of internationally recognized music educator and multidisciplinary scholar, having to be at the mercy of his and his cronies, due to being disabled by the life threatening illness... And along with similarly unethical criminal minds, they could be in the position to define the perception and discredit the character and disparage the good name of the person, whose intelligence they simply have no way to merely begin to upraise, while working intently and actually coming very close to extermination of the human being, by issuing documents that entangle others into horrendously cruel crime - thanks to the taking advantage of the loopholes in the legal system...

And this example of the still unresolved eking experience of living under the threat of being targeted by unethical entities in the uniforms of public servants, helps understand the incredible benefits of the global scale from this refined by Bach fool for teaching the skills of music embodiment can be utilized as the mediation device for the often occurring misfirings of the human brain - through building inner capacities of emotional intelligence. These yet to be tapped by majority of population abilities for self growth towards achieving **higher human potential** can be enabled by harnessing Music instinct, based on the involuntary release of neurochemicals involved with interaction of the brain with various types of music.

(ABOVE **IMAGE**: Graphic representation of the sense of cognitive dissonance, comprised from the hard to grasp and untangle the snowballed elements of the compound trauma and overcompensation for them - - all remarkably illuminated and inspired by timeless genius Bach.p

▲ *Why MCS is the painful gift for humanity for protecting health and birthright for your offsprings*

PAINFUL GIFT OF MCS IN THE CONTEXT OF APRIL 2025 DECLARATION OF FIRST EPIDEMIC OF ENVIRONMENTAL ILLNESS OF AUTISM BY HHS SECRETARY ROBERT F KENNEDY IS PARADIGM CHANGING FOR A LONG TIME DENIAL OF THIS GLOBAL THREAT

The word ALLERGY is common and widely used by millions to refer to the involuntary physical response of usually rather mild suffering from becoming intolerance various outside “allergens”. But very few people realize that allergy is the warning of the body about the failure to process and cleanse out toxicants that had been normalized and illegally legalized to be a part of many consumer goods, that play the indispensable role in facilitating multitude of perceived as “essential” for navigation through conventions of our life... But this word ALLERGY has been used in detached from the true meaning of body’s disability to cope with the toxic stress ways, including both the aims to describe the discomfort of various degrees and types, as well as to mitigate its intensity with medications dedicated to this specific calamity of ALLERGY. But the majority of medical providers never told their allergy patients of the real cause for it and thus, this means, that no attempt to merely aim to its cure had been made by most of medicine practitioners, according to such training at medical schools, based on such irrationally focused textbooks. And there is no secret that the key beneficiaries of this normality of most bizarre cruelty are the producers of allergy drugs. And more than one generation of the minds of medical professionals had been nurtured into this quite terrifying self demise... But human body isn’t made from no perishable materials... And thus, more and more people experience the state of the higher than average response to toxicity, when the allergy medications make no difference and only worsen the suffering. These problems of suffering from immuno-compromising impacts of toxic Anthropocene had been called environmental illnesses due to their origins of environmental pollution with injurious toxicity. And that is why, this autobiographical publication will be revelatory for any “allergy” sufferers, helping them finally to connect the dots about never explained to them causes of their worsening health, allowing for addressing them at their roots.

In this context, the state of widespread maladaptive habituation to environmental toxins, that resulted from DEACTIVATED PAIN ALARMS TO TOXICITY, brought our society into never experienced before state of **sensory complicity to normalized chemical hazards in many consumer goods**. This maladaptive conformity made our **self preservation instinct dysfunctional**, while most of people aren’t able to be aware of such profound loss, caused by **emotional zombification and sensory dysfunction**. But the cumulative effect didn’t diminish the hazardous impacts of the ongoing “small” compromises of permitting impermissible health hazards, that were made under the conformity pressure of **the false values at the level of collective consciousness, based on institutionalized cognitive dissonance**. These cumulative effects, that could not be replicated in the research settings, had been leading to the ongoing depletion of the universally essential and most precious of all “asset” - the health and optimal function. The bittersweet nature awareness of this self-defeating trend is critical, since the new level of conscious vigilance had become existential in the face of such profound and dangerous, yet **hard to grasp** sensory incapacity. In the plain language of colloquial expressions this means, that throughout a number of generations the most obvious human need for the safe and healthy environment got pushed down from **the top survival priority** and was replaced with variety of social obligations, that were made to appear as “far more significant” due to subliminal conformity to the variety of **social pressures**. **The task of mobilization of everyone’s personal**

survival battle shifted into the category of **CONSCIOUS TASKS**, since the inheritance of our self-preservation instinct, taken by all for granted, had become ... turned off and dysfunctional, no longer informed by the sensory input of warnings of pain. But these elusive trends of interconnected individual and collective consciousness were not recognized, due to subliminal nature, until they became illuminated through the observations of *Bach Sensory Deactivation Effect*, with textbook changing global impacts.¹

Princess Kate Middleton stated that she was very surprised with her cancer diagnosis since she had a healthy diets. But her cancer doctors failed to explain that if could have this sobering awareness of the

this state of profound sensory dysfunction of DEACTIVATED PAIN ALARMS TO TOXICITY, it would have been the first lifesaving step, in order to get special help from capable to sense toxicity individuals under to avoid her cancer diagnosis. And the same applies to millions of other cancer patients with young children, suffering from fear to become orphans. And this awareness could enable them to do their very best for sustaining own health and for allowing the best chances for that to own offsprings and for humanity. It allows to grasp the new perspective for navigating the life in alignment with the key biological needs of every human being, instead of continuing to lead unaware of self defeat existence... This new glance on the reality enables to understand the need for shifting away from harmful for all mental habits of addiction or toxic conveniences

The language of most of environmental advocacy leaders and the common media coverage had been immersed into political correctness of rather general terms that have no personal resonance to most population, by avoiding the true expression of inconvenient truth about the fast approaching time - **the widespread rise of the FEELING of agony of pain and suffering among vast amounts of population**. While being equipped with numbers from the research, most of coverage of the problem had slipped into politically correct vocabulary of terms, that had been consistently deleting the subject of **feelings of loss and despair** from the fast growing, yet left for the long time unannounced pandemic of environmental illnesses, making common impression AS IF it was “NOT preventable (!)”. And instead, rather abstract and hard to resonate to categories like “climate change”, “rise of the sea level”, “sustainable future”, “recycling” etc. replaced the the personal sense of loss, distress and the sense of “the hell on earth”, that will be the inevitable price to be paid by the dear loved ones of today’s adults for the lack of their awareness and for resulting state of **staying idle, disengaged and doing nothing or not doing enough today**, during the fast closing window of opportunity to make a difference and to change the course of sleepwalking through the fast lane into self demise of environmental illnesses...

¹ Deeper understanding of inner mechanisms of self defeat were made possible to observe in Bach Sensory Deactivation Effect that was based on the sensory-augmented data, enabled by the music-embodiment of the collective trend of self defeat, captured thanks to observed discrepancy of didactic aids with the score facts - missed in plain sight in the tiny didactic maverick, composed by Bach for teaching self reflection skills.

Majority of individuals, who fear the loss of humane features, that distinguish the identity of our human race, due to implantation of artificial intelligence devices, are in for the shocking evidence about such terrifying manifestations of this trend with no involvement of devices, but due to the largely left unnoticed and disregarded unfamiliar to most people concepts of **conformity to authority pressure to lower moral values**, along with social influences by **groupthink and culture of moral atrocity**: The widespread trend of drastic depletion of both **compassion** along with the lack of **SELF-compassion** both in personal attitude of more and more people, as well as in the policy for navigation of medical care and social services for the pressing needs of underprivileged communities, plunged into suffering. This subtle, yet very dangerous trend in collective consciousness is highly disruptive of the foundational pillars of our life in the society, based on the collective cooperation. We all count on it due to our innate collective survival instinct(!), that had been essential for the millennia of societal evolution. But it is best to learn about the subject and address it BEFORE we end up in the trying circumstances, suddenly discovering that what we need the most, is NOT available. Being **at the mercy of the merciless people, when our life is in the hands of those, whom we tend to trust due to their professional affiliation, is very dangerous. And even substitute of empathy and compassion with detached concern for health** is dangerous and should be made *unacceptable (!) throughout designed assessment for fitness to duty to handle our top "asset" - human health and life, in the face of significant disruptive impact on human psyche by the norms disruptive anthropogenic toxicity.*

We have to face the sobering reality: **Prior to manifestations of the fears of being the victim of malfunctioning and heartless AI in caretaking and medical field, the public could no longer assume TODAY, that those professionals with professional caretaking duties would abide by the code of ethics of their profession, since the shocking evidence proved, that justp the country had become not only legalized, but also socially acceptable(!) in more and more situations - DUE TO NO MERE PUBLIC DISCOURSE on the subject(!). And despite the fact, that no one deserves to experience such terrible cruelty at the most vulnerable moments of our life, this rooted in the lack of SELF-compassion, deepening trend of collective moral Blindspot and social dysfunction, is one of the key reasons for the long time dismissal of the urgent response to the well known fact of research:**

The new born babies had been tested for carrying toxic chemicals, ingested through mother's placenta!

This detected danger to health, that is present in the life of babies even before their own toxic exposures to environmental toxins, is evident of another sobering element of normalized environmental insanity: Each new generation is being born with **more and more birth defects and with more and more of chronic illnesses, due to the lower and lower threshold for "PAINLESS" tolerance capacity** of the rising environmental stress on the subliminal bodily abilities of the hard work of cleansing from the chemical hazards, due to ongoing exposure to habituation to the **normalized** chemical threats to health, that had been permitted in many consumer products - based on the irrelevant to human biology, currently used FALSE Health and Safety standards for manufacturing. In fact, they are especially notoriously low in USA, due to **legalised bribery of political campaign contributions for legislators**, who are compromised and forced into dysfunction by the unconstitutional system, based on the culture of moral atrocity. And another unconstitutional concept of governance - **the impunity for crimes of public servants of all ranks** invites them to practice outrageous incivilities, while being certain

about easy way of getting away with it. Only when their victim's losses involve very large claims, there may be a chance to find justice, while the most impoverished individuals, who need justice the most, can not afford it, since they can not the hire effective legal representation...

Due to the lack of intuitive alignment from interconnectedness of all parts of our reality, the abusers of trust seldom realize, that their actions contribute to the trend, that would hurt them and their loved ones as much as the victims of their betrayal of duties. And often such cruel crimes are committed by seemingly nice people, hard to suspect in evil acts. And when this type of dangerous attitude becomes the basis for the institution, the pain from the compound harm, empowered by cronyism of several people, making impression of being entitled to commit sinister crimes, makes it ever more intolerable. And while such violations, involving conspiring together entities, are made to be much harder to address and stop as well, the new level of vigilance is critical to implement, in the face of the rise of this trend of emboldened evil.

The lack of self reflection skills for cognitive dissonance resulting from unpacked trauma residue and social influences among educational policy designers who operate in their own lives based on detached concern vs empathy and compassion, is the significant contributing factor for the deepening underdevelopment of the evolutionary young human brain - still very susceptible to instinctive incivilities that plague our civilization facing multiple anthropogenic global threats.

At least brief familiarity among the readers with the concept of "social influences" may be critical for effective navigation in rather bizarre paradox, described by late Stanford professor Zimbardo as "seemingly nice people, turning evil" under the influence of the institutionalized culture of moral authority, just according to the framework of Lucifer Effect (known as Stanford Prison Experiment), well as Milgram and Asch Effects. And awareness about this type of Blindspot is critical for the urgently needed mechanisms for curbing what seems to be now as the unlimited opportunities for the abuse of disabled individuals - one of the most defenseless populations.

And the time has come for putting the stop to the shockingly blatant disgrace towards suffering of individuals, left with no help of any kind, because they became disabled by unforeseen environmental illnesses, which remain paradoxically **unknown among the majority of the professional disability advocates in the legal field, while many of their loved ones had been suffering from it and many more of their offsprings will be left with no mere effort to care for their environmental illnesses, it instead will be subjected to cruel persecution.** Sadly, before our society would recover from the still ongoing chemical experiment on population without our concern for it, this type of illnesses is likely to rise to dangerous for humanity numbers and consume more and more victims, due to toxic exposures, that had already took place to date. And it had become inevitable, EVEN IF we as the society were to make detoxing of many parts of the reality to be our top priority tomorrow. While the society's leaders have moral obligation to do everything and beyond, in order to bring focus on this indiscriminate global threat no later than NOW, and demonstrate by example their grasp of NO BUSINESS AS USUAL for everyone to follow, meanwhile, the sobering statistics of the damage, that had been already done demand for the responsible actions of providing adequate response to the victims of environmental illnesses, caused by distorted values in our society and related changes in the capacity to practice empathy and compassion. Compromise on this pressing need to find means for monitoring the moral fitness to handle the matters of health and safety may not be permissible under any circumstances, despite being turned into normality. Denial of this sobering reality is the important to note response, that is evident of environmental insanity in

leadership positions, revealing of the troubling misfit to authority chairs - now no longer bearable for the human race on the brink of extinction...

And in order to be effective, it is important to grasp **the root psychological drivers of maladaptive conformity to self defeating habituation**, that had been left unnoticed for too long, for a number of generations... And thus, leaving **its important, but elusive and hard to grasp key-component - zombification, left without counterpoint to emotional/sensory reawakening through music and the Arts, dangerously dominant among vast numbers of population, led to the terrifying global trend of lost parental instinct for prioritizing health and safety of the future generations of their OWN offsprings...** And what is ever more eye opening is the fact, that zombification had become evident among many musicians, who had been effected by **indoctrination into mechanical music making, needing rehabilitation - as witnessed in observed Paradox of invisible dissonance in Fugue-Parody by J.S.Bach. This global crisis in music education was illuminated by the failure of many musicians to pass Bach's "Laughter Test" for emotional resonance to his sense of humor**, that pre use of emboldened dynamics for making noticeably funny the performance of his musical satire on the dogma. As the result, the emboldened use of banned during his time dissonance was muted and the mere presence of dissonant sonorities, along with humor-metaphor, were left ...paradoxically undetected(!) in many didactic aids on interpretation of Bach.

These now self evident observations illuminated deeper understanding of the inner mechanisms of the earlier discovered Effects of social influences. For example, it became clear that zombification from becoming normative emotional detachment and sensory deprivation had been leading to disability for existential capacities of sensory perception. And due to conformity-driven **maladaptive morphing of individual perception to fit conventional expectations**, majority of population lost the awareness of the indiscriminate impacts of devastation, resulting in the very damaging form of self defeating zombification - **the habituation to the impermissible dangers for human health and life, harmful, yet commonly tolerated**. Normality of detachment from emotional reality and living in dire disconnect with the subtle impact of hazards, that were permitted by irrelevant to human health Safety Standards for manufacturing, does not make its today's victims and their offsprings "exempt" from the plight of suffering from **the cumulative effects of falsely appearing "tolerable" toxicity. It comes at the price of mental performance that is hard to track since it's degradation is as gradual and as subtle, as the accumulation of the physical dysfunction...**

The numbers do not lie, when the evidence screams of the rapidly increasing amount of victims of environmental illnesses (as in above stats for MCS and infertility etc). But the problem is that today's mothers don't feel their OWN pain from toxic exposures and that is why, many of their lack capacity to imagine the future screaming of their grandchildren, suffering from the agony of pain, because of the cumulative effect of toxicity passed down to them from today's exposure of childbearing population, due to societal addiction to the toxic conveniences and related transmission of genetic mutations. And **males, who dominate most of decision making positions** are even less capable of this parental instinct for preserving their offsprings - sadly, due to lower natural genetic capacity for child rearing often left underdeveloped... Prioritizing of avoidance of **painless for them toxicity over other social pressures is off their unconscious "list" of priorities, especially when they belong to the culture of moral atrocity...**

The widespread dismissal of the fact of the increase by vast numbers of environmental illnesses is due to this subtle loss of the capacity to perceive and **prioritize** their danger. This shift in

perception of reality has been allowed to be dominant among the academic elite and decision makers, who assume that they could trust their senses and a gate reality accordingly, but the reality is CONTRARY to the expectations to rely on this sensory instinct, leading to the dangerous warped prioritizing capacity. And that is why, impermissible dangers of the delay of the rapid and all society's mobilization of all resources of time, effort and funds (that resemble commitment), that are necessary for being urgently engaged into detoxification of all parts of our life, were misplaced among priorities for securing the birthright and preventing what is yet to be grasped by majority as **preventable(!) chronic and terminal illnesses**, such as cancers, strokes, heart attacks and various other lowered genetic abilities and birth defects of mental and physical dysfunctions,

In this context, there may not be any doubt, that there is no "IF", but only "WHEN", as it comes to the subject of the long lasting inquiry for the reasons of NO PRIORITY, and NO mere systematic effort established for trying to estimate the severity of such impacts in PERPETUITY. However, by combining various statistics re offsprings generations of the future offsprings to be impacted by the problem in the ACUTE form of suffering among vast numbers of population had been out and for a while, warning about the amount of victims of environmental illnesses rising **to greatly exceeding the numbers of those, who need help with illness over healthy workforce able to provide the care.**

And that is why, in the face of the fast approaching "new normal" lower and lower health status, it is prudent for today's family members to take seriously such reminders of otherwise left outside of their PRIORITIES parental duty to be aware of the brutal truth:

Today's and past uses of toxic conveniences WILL come at the grim price of agony of suffering from their cumulative effects to both their current victims and those, who would be bound and forced(!) to carry the baggage of the genetic mutations of terrible nature for generations ahead - if any may be left and allowed to be born within just a few of next generations...

Will they be persecuted with cruelty for inconvenient for our society environmental illness, in addition no means and facilities for care?! Doing nothing about it means the answer YES to this very urgent question... Then, we should be honest with those, who are young today and trusting us to take care of them: Doing nothing means being utterly cruel to them, since they won't need any of material wealth, while struggling in agony of pain for merely staying alive...

The members of the operation ring had brought their hostage situation to the point, when the help and support from every progressively minded person has to be demonstrated to protect from deliberate efforts of harm the LIFE of the diligent

advocate for environmental justice with rare intellectual leadership MCS Rozalina Gutman !

Just like one of the top leaders of the intellectual vanguard of humanity- RFK JR cited the terms from her presentation, many other advocates for environmental justice deserve to benefit from her visionary idea and their manifestation into reality of practical implementation that could be also shared with the world

▲ FOLLOW THE LEADERSHIP OF RFK JR. TO SELF-MOBILIZE FOR CHANGES AND TO SHOW MINDFUL SUPPORT FOR INDIVIDUALS WITH INTELLECTUAL LEADERSHIP OF MCS

Indeed, this is the grim reality that had been left with no meaningful efforts to address. Except despite all odds, the advocate for enforcement of environmental justice Robert F Kennedy Jr is in the important leadership position in public health. However, no single person is capable to change the vast global state of mind, currently focused on the inertia from the flawed past governance. This moment of pivotal significance demands for demonstrating of the agency by every single member of the humankind.

And there will be no reason for this publication unless it would offer the solution for the utmost challenging situation:

Detoxification of dwellings and consumer products surrounding us all the time depends on

#1 task: IDENTIFICATION OF TOXIC OFF-GASSING PRODUCTS, sold as “safe” with no warning re the harm of their cumulative effect. And the problem can be solved by the individuals with the remaining capacity for sensory active pain alarms to toxicity among the victims of MCS. Environmental activists can create safer communities, by helping to guard still rare individuals with MCS and assist them in their battles for accommodations for their access to various venues, based on ADA requirements, that can be enforced upon MCS-disability needs.

#2 task: MCS victims can help with guidance on the methods of detoxing of some products and verify their safety after completion of the steps. (Not all types of products can be detox and many have to be let go for personal safety at the lesser price of material loss...)

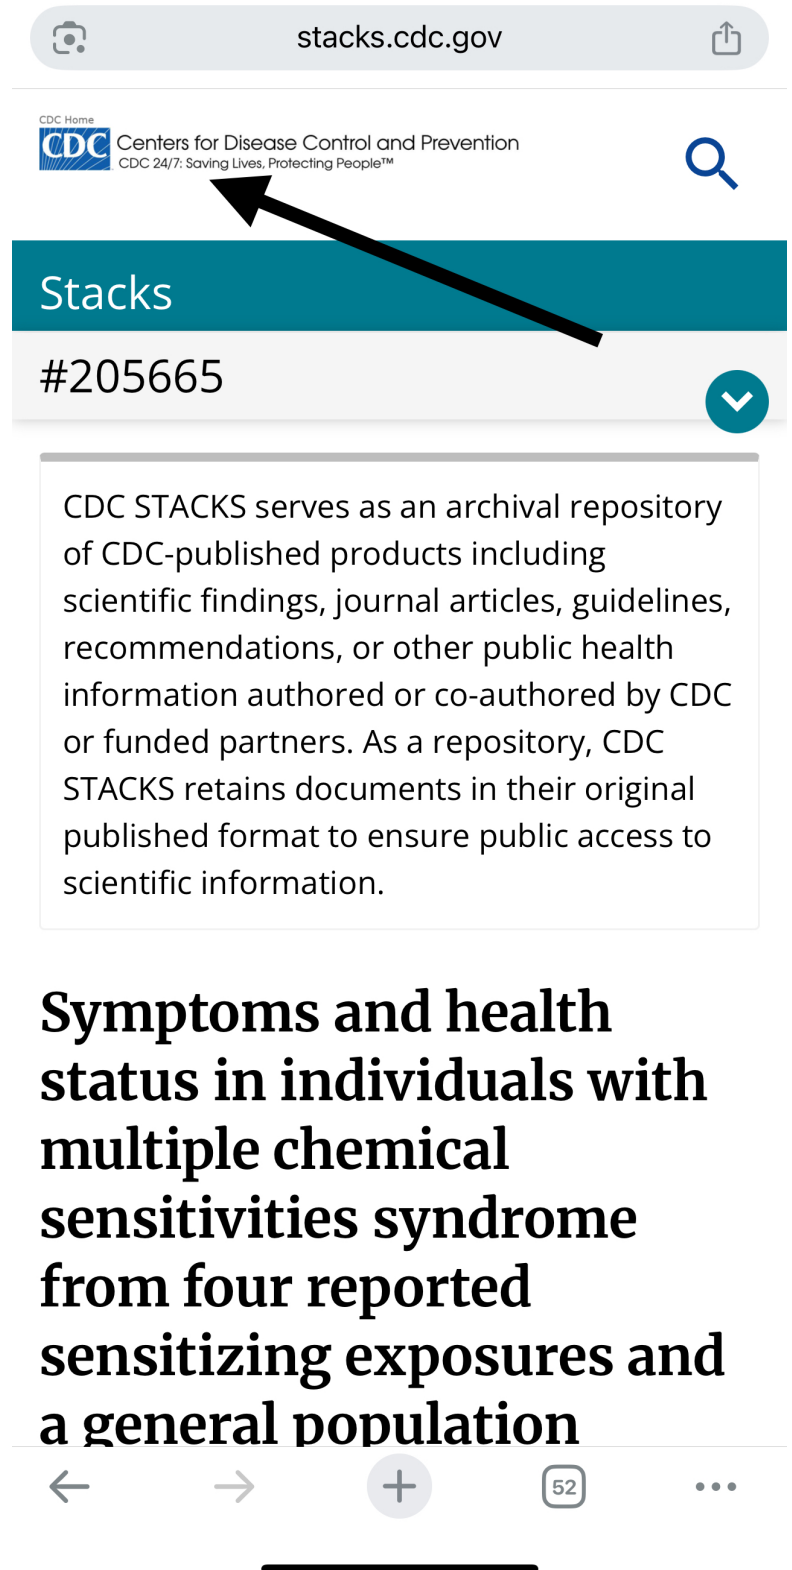

These and related issues were the main reason for my sharing of the below facts of my real life, that are stranger, than dystopian fiction. And it is due to the pressing need for population to mobilize in the face of spreading of the shocking and worsening reality of the deeper trend of normalization of ENVIRONMENTAL INSANITY, that is illustrated in this effort to leave the account of **“Survivor’s Guide for grandchildren of today’s adults, incapable of parental love and defense from toxic conveniences during COUNTDOWN2045”**.

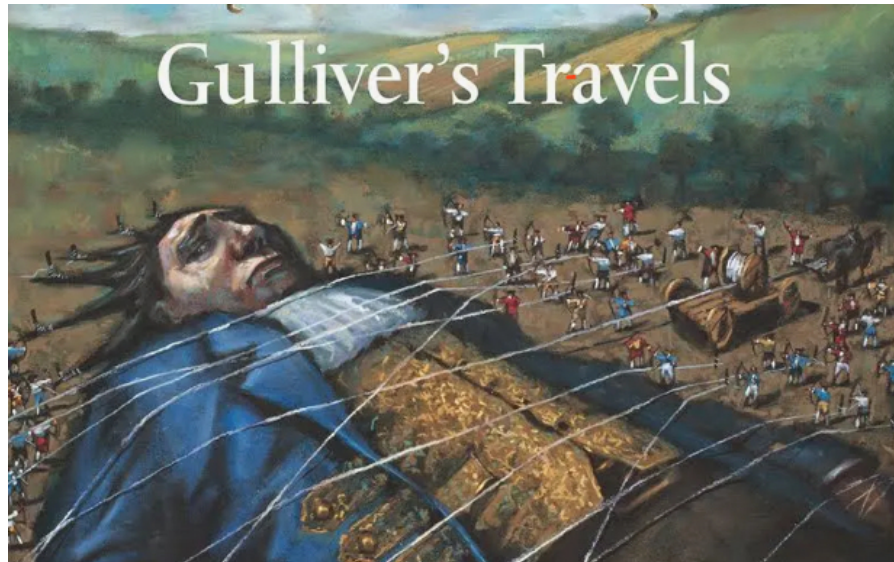

Today’s population has no option, but to awaken to the task of facing the sobering reality of their LOST ability to detect instinctively and to respond with instant instinctive escape from the toxicity, based on the pain alarms system that we are used to rely upon. The reality is that our signaling for the top priority pain alarms system NO LONGER WARNS US OF TERRIBLE

DANGERS OF ROUNDUP, fragrance in fabric softener, injectable residue of chlorine on the surface of tableware, scent of candles use for prayer for health, etc. although it makes us all believe that we can rely on our senses helping us to quit everything on the path to finding solution for a toothache. This type of instinctive priorities we benefit from, when we are forced to pull away from heat based on the pain sensation from burned skin. Such elusive and unconscious “decision making” takes place intuitively and irrespectively of any other priorities and pressures from fears to loose social approval or to fail the duty to earn certain amount of wages that rewards the consistent presence at work, etc. It is critical to face the urgent message of this eye opening, but left under-publicized data on the fast approaching, but still preventable for the short time global collapse, resulting from rapidly increasing numbers of environmental illnesses, that had not been labeled AS SUCH, by the profit driven medical industry. But the numbers do not lie in the statistical forecast of **the fast approaching vast increase** of the PREVENTABLE environmental illnesses just within the next several generations. (For example, one of such environmental illnesses is INFERTILITY, forecasted by 60+ global studies (COUNT DOWN by Dr Swan) to turn into GLOBAL crisis by 2045 or sooner(!)...) And unless the shift to the attitude of NO BUSINESS AS USUAL is self-implemented voluntarily by ALL members of the humanity - with no exception, by sincerely committing all available resources to assure healthy capacity for sustainable existence, in the face of already occurred and presently occurring exposure to environmental toxins, the amount of individuals suffering from similar complex and challenging health conditions, caused by anthropogenic, man made/man-caused spread of chemical hazards is to increase to the unseen before agony of suffering among majority of population - all within the next several generations. Evidently, in addition to incapacity to act “outside of the box” for solving newly emerging problems of environmental illnesses, leading to chronic ineptness and ignorance of medical professionals, the victims of the same or similar to my environmental illnesses among the offsprings of today’s adults will remain in the position of being subjected to normalized suffering from cruel persecution and criminalization of the their disabilities, implemented to justify the retaliation to duties for caring for the ill and disabled, by using loopholes for avoiding the requirement to accommodate disabilities. And the rising **dangerous level of compassion fatigue and debilitated ability for empathy** to suffering of fellow humans is one more terrifying result of the impacts of the hormone disruption by normalized toxicity. This fallout from the unprecedented in human history experiment of chemical use is easily comparable to the warfare on population, due to pursuit of vast profit in disregard of suffering by impersonal conglomerates of corporate entities, presided by manipulative psychopaths. And they are incapable of grasping **indiscriminate** nature of caused by them catastrophe, often irreparable with any amount of money, due to being detached from the concept of interconnectedness of our universe - the primordial paradigm of our reality, based on vibration, being the universal measure of all matter, differing in various frequencies at the subatomic particles level (as in Einstein’s “String Theory”).

This reminder about the great significance of the profession of music educators, dedicating their lives to sharing their gift of music to help fostering the skills of using music for realignment of the mind and body to the forces of creation of our universe, may not be missed at the unbearable price to humanity. Since the time of lifetime of Master music instructor Bach, normalized persecution of music educators by systematic underpayment and devaluation of their unique, rare and sophisticated skills of repatterning of the emotional habits through music curriculum, had not changed since the Dark Ages from barbaric disregard of this vital for ongoing human development practice.
All forces of progress are overdue to help rescue this profession!

▲ THE TORTURE OF THE GIANT BY LILLIPUTIANS

(Editorial summary)

ABHORRENT CHARACTER ASSASSINATION, AS THE FORM OF CRUEL RETALIATION TO URGENT NEED FOR RELEVANT HELP TO ROZALINA GUTMAN WITH ACCESSIBILITY ACCOMMODATIONS FOR MCS, IS CRUEL & SINISTER COMEDY OF ABSURDITY

Narratives of the shocking circumstances of the struggle against human rights violations by threatening for life of MCS victims had been deliberately underpublicized, since their content often points to the toxicants that are the universal hazard and may not in use. Often such carriers of MCS can identify through painful sensations or discomfort with great accuracy of the lab the source of toxicity, that can be then proven by the lab... And for variety of ill-minded reasons instead of gratitude, they may be subjected to hostile retaliation to make changes.

One of the telling examples of MCS survivor is **Dr. Ann McCampbell MD**. She initiated the **special Task Force on the related to advocacy for MCS issues**. Her website contains variety of important links and helpful references for those interested in learning about MCS and related aspects of logistics dictated by it. (<https://annmccampbellmd.com/sample-page/bio/>) And sadly, Ms. R. Gutman's story of the survivor refers to the same term of "siege", when she described her experience of trying to find solutions for her medically necessary needs of acute MCS disability...

The above copies and videos provided the evident insights into machinations and schemes for deliberate and evident assault on the very intelligence of Rozalina Gutman, revealing both cunning manipulative style of actions as well as the general stupidity of the futile and false allegations. However, while being laughable, these acts are at the same time purposefully made to be injurious for her health and life, serving as the clear display of blunt cruelty of slander and lies, employed with unlawful misuse of medical terminology - easily proven to be invalid and propelled by concealment of malicious crimes, turned into regular and institutionalised policy of operation against catalysts of change. Dominance of public service agencies by these criminal minds left with no means of recovery visionary thinker and multidisciplinary scholar, music educator, internationally recognized for her unique methods of fostering prodigious success in her students through brain optimization(!).

The description of involved events includes the acts of the unprecedented malice to hold her hostage by the individuals, demonstrating evident mental contradiction of such outrage to the **actual duties and declared to the public purpose - to assist individuals in crisis.**

This urgent version of Volume 3 (in this current draft version) features the evidence of actual events, that are still in progress and are developing in the most precarious manner and with the unpredictable future impacts and circumstances of unknown nature, yet to be reported and undated accordingly in later editions, to enable the readers with the grasp of further outcomes. The actual statements of Ms. Rozalina Gutman, that were provided for supplying the evidence of the unprecedented acts, driven by the unbound ruthlessness of holding her HOSTAGE during the week (July 5 -14, 2025), were made with the intention, in order to restrain the unethical and ill-minded individuals in their unbound retaliation to change, that Ms. Gutman's illness represents through pain, common for individuals with such condition - beyond her will or wishes. (For example, during one of his testimonies for Congress Robert F. Kennedy mentioned his child's similar struggles with Lyme disease that results often into similar condition of MCS.). This evident enslavement by dogma and resentment to change (based on brain plasticity) had driven into multiple abuses of power and trust of the public, affiliates and coworkers those individuals, who misused their position of power against the most weak and vulnerable among the society. The self explanatory factual illustrations allow to observe their evident search for proactive, yet misleading methods and ways **to justify past crimes and to create fraudulent excusiology to continue to deny to her utmost urgent, relevant to her medical necessities assistance, due to her severe case of environmental illness of MULTIPLE CHEMICAL SENSITIVITY (MCS).** It was documented and diagnosed by the esteemed in the field Expert medical doctor.

However, after unlawful, biased, cruel, yet blunt refusal to obtain and to use these medical records, including her medical diagnose from her doctor by the employees of the local "People's Concern" agency (for assisting individuals in crisis) in summer 2022, now, 3 years later while making the manipulative impression of finally trying to begin solving the problems, caused earlier by associates, the members of this agency in collaboration with their cronies-affiliates with criminal minds went beyond any and all limits for cruel incivility: They were involved into conspiring for concerted effort of several agencies to commit the acts of medical fraud, harassment and manipulative coercion of Ms Gutman (starting in May and going on for several months) in order to manipulate and then, to force her into signing misleading, yet officially looking documents, that would lead the individuals in crisis into self-incrimination with nonexisting "mental dysfunction" diagnosis, that **takes away the person's capacity for being treated with dignity, respect and credibility in many circumstances, including the venues for justice against such outrageous method of audit patient's trust and causing harm with certainty for getting away with it, while in pursuit of the lucrative pay for using costly drugs** (many with serious known side effects) while making misleading impression of providing "valid and compassionate medical care and crisis recovery assistance". The ease of victimizing those individuals, who come for help due to being in already distressed and vulnerable position are known to have no means to stand up against such sophisticated schemes by clever psychopaths, demanding for complex legal defense, revealing the criminal intent based on the dangerously lacking humane resonance to suffering. And as the result of such horrendous crime of industrial scale and with all attributes of "official" practice, the criminal minds could gain the right to subject their vulnerable victim to treatments, that are interests to the medical needs and thus, harmful due to being irrelevant to the real and documented illnesses of hers that include the history of cruelly the life threat - the left unresolved women-specific heart attack(!). And in the case of stranded in the area author Rozalina Gutman, the degree of her acute intolerance to normalized hazardous chemicals had risen to the undeniable life threatening form of this

immunocompromised condition. In fact, the reason she ended up stranded in the area was due to her strive to find treatment with one of the key solution for this illness requiring for isolation from any exposure to any products with normalized and perceived as “common” degree of chemical toxicity. But she became the victim of clever scam and was manipulated to travel long distance into the area with notorious toxicity of natural resources (air, water, soils) left undisclosed (with founder no longer present due to passing)... Ms Gutman was also in search for the writer’s retreat due to invitation to provide extended report on her summary re her textbook changing discoveries, form the chair of ISME Research Commission. (She had been presented at various world conferences by this international conference organization, including organizing of her own Intl Symposium on advocation music education through compliance with brain/music research.).

Among other serious outcomes from long time neglect and refusals for medical care and related assistance, it became very difficult to find chemicals free housing, due to the mindless dominance of toxic practices in the construction and maintenance of rentals, demanding for special accommodation and assistance during the process of search for the housing for MOLD REFUGEES, unable to use ridden by mold and dangerous shelter and most of the belongings in it, similar to the losses to fire. But unlike the common structure of assistance services for other disasters effecting shelter (like fire or flood victims etc), government agencies at both municipal, state and federal levels absolved themselves from the critical medical necessity of providing shelter with medical grade of safety from toxic hazards, despite the established knowledge of the need for alternative shelter of this type. Indeed, the task of recovery for Ms Gutman had become complex, involving solutions, based on the creative problem solving with “out of the box” approaches, when it comes to having to address the failures of many years to help with relevant rescue steps.

However, one of the main challenges is due to difficulty to merely comprehend the problem at hand, since the widespread normality(!) of toxicity, that had turned into “the fabric of our life”, due to maladaptive conformity among most of population, becoming numbed down and essentially, incapable to detect and thus, to avoid preventable anthropogenic (man made/ caused) hazardous - dangerous for ALL(!), that had been legalized and normalized, due to corruption. The resulting senseless culture of moral atrocity has the power to alter social brain and force to conform to the collective Blindspot the minds of people (as demonstrated in Stanford Prison Experiment, referred as Lucifer Effect), unless they possess currently rare skills of self reflection and proactive counterpoint to instinctive subliminal zombification through *emotional/sensory reawakening, based on the Arts and music*. These instinctive forces of social influences, rooted in **the herd/tribal instinct** make freedom loving birds to act like “nuts and bolts” of the flock-mechanism, in order to sustain migration flights together. (The achievements of Ms. Rozalina Gutman’s unique scholarship include her unique observations of such pattern, that demonstrated staggering power of this evolutionary old instinct, indiscriminate of academic titles, fame, acclaim, distinctions of highest honor - thanks to the re-discovered by her didactic aid for self reflection, designed by Bach in the most genuine manner, demonstrating his mindset of neuroscientists, able of intuitive use of musical humor, and providing stellar example for harnessing its dopaminergic effects for today’s brain scientists for effective practical solutions, based on the transformative impact for overcoming mind paralysis, resulting in retaliation to change - and he critical ability for propelling much needed progress in the area of self propelled evolution of the human brain. And the method of transforming the instinctive hostility responses based on pathological maladaptive lacking mindfulness reactivity, as a part of fight or flight response, **could be repatterned as well** - all thanks to designed by Bach didactic piece, that can

serve as the scaffolding for self reflection and self growth(!). And in today's world where we are all living while being held hostages by the man made, anthropogenic global threats, nothing could be more urgent and important, than initiated by Bach music-based cognitive technology for the development of the skills for self reflection and self mastery, related by him with yet to be matched efficacy.

For example, thanks to own ingenuity and thanks to being a good student of Bach's scores (considered to be among the most complex music ever written in western tonal system), Rozalina Gutman's proposal for utilizing this piece for teaching the skills for the effective resolution of COGNITIVE DISSONANCE by brings hope into the darkest corners of the human psyche. Her method of using her discovery of Bach's daring laughter at his time's senseless dogma demonstrated the new meaning of the popular title of Bach, being referred as "*the 5th evangelist*", whose yet to be honored contribution allows to create the actual change of mental patterns according to the calls for upholding high moral and ethical values, helping to go beyond the wish for overcoming the wired through childhood developmental trauma *patterns of self defeat and harm*, going beyond the intention of verbal prayer into repatterning of the old habits and aligning the actions with desired, new habits allowing for the pivot of the life path towards the peak performance at Higher Human Potential. (Ms Gutman had been recognized for her ability to foster prodigious success in young students, thanks to her unique method of encouraging authentic self expression along with effective technique.)

Ms Gutman's resonance to Bach's "invisible" and deleted from his legacy innovations of Master music educator with neuroscientist's mindset, demonstrated shared similarities of having to lead the life of gifted and unconventional Consciousness Transformers, that had been derailed by the incentives of the mediocrities in power positions, limiting the global impacts of genius at the unbearable price for humanity for generations to come. Both exemplary intellectual leader Bach and the humble student of his score Ms Rozalina Gutman had to battle for life with the concerted efforts of individuals, who wasted their gift of life for being the embodiment of the public health hazards, threatening the very existence of the catalysts of change - at the unbearable price for humanity, that now needs the effective transformative cognitive technology like never before, while at the brink of collapse by self demise, due to severe brain underdevelopment among majority, as well as among intellectual elites in academia and political power circles.

This Ms Gutman's presentation of indisputable evidence of the urgent need to restore justice from violation of her fundamental human rights brings light both into the personal tragedy of the victim of evident deterioration of the professional integrity and personal resonance to human suffering. It also provides the rare insider view of the victim of the systematic rough operation created for eagerly misuse of patient's trust, while in the position of desperately needed special assistance by the prerecorded by the public as "effective" rescue organizations, masking the cronies' operation of several conspiring together agencies, resulting in the stunning with bold execution of menacing FRAUDULENT DIAGNOSIS. Routine random distribution of well paying for it drugs with incentives and rewards from pharma and measurable public funds is both shocking with premeditated cruelty and is also absurd and revealing of its many self conflicting and self evident errors, demonstrating profound cognitive malfunction along with mismatching falsifications and blatant ridiculous lies. While this narrative seems like the improbable and surreal joke in the grotesque style of the Comedy of Absurd, this true story of tragedy of visionary woman, plunged into endless suffering by irresponsible and sinister. psychopaths compare to the Giant being tortured by notorious Lilliputs for being a misfit to their world of the limited and hostile minds, while under the deceptive cover of insincere smiles of seemingly nice

criminals in the official uniform of nurse, counselors, public service workers of municipal administration. As for City of Malibu, its representatives may not common excuse of budgetary deficit due to incomparable financial advantages over budget of most of other municipalities on the planet, due to serving one of the world's wealthiest communities, that is the home of many celebrities and patrons and patronesses of the good causes, remaining unaware of the outrage funded by their lavish tax donations... Instead, the shivery level of ethical impoverishment is evident in the captured acts of blood chilling crimes...

That is why, the main contents of this Volume 3 in this DRAFT version are the actual and desperate appeal of the author Rozalina Gutman for the urgent interference and restrain of the blunt lawlessness and cruel incivility of the concerted effort from several conspiring agencies in retaliatory assault on her health and life, made vulnerable by her left neglected and with no help illness.

The fact of the illegal dismissal and lack of medical training in addressing the impacts of mold exposure among majority of hospital personnel, is known to cause severe immunocompromised condition of acute case of intolerance of even minor exposure to (the known to be toxic for ALL) normalized chemical hazards. And that is why, the victims of MCS are in possession of the unique and painful gift making them capable to help detecting and avoiding the universally hazardous for ALL illegally legalized chemical hazards. And this subject links this publication of her *Biographical*s with the Addendums for written by Rozalina Gutman ebook on her visionary discoveries of the discrepancies in many textbooks on the issues of the cornerstone in music pedagogical scholarship related to the shared Blindspot for interpreting music of Bach. Her ability to overcome common stereotypes in following senseless dogma had been lauded by both her colleagues and outside of her professional field. Her legacy has been written into the history of humanity, since **one of the top leaders in radical environmental justice Robert F Kennedy had cited the terms from her presentation '2022 at his HHS reset broadcast - listen to related RADIO interview: <https://paradoxofinvisibledissonance.com/rfk-cited-rozalina-gutman>**

It takes special intellectual leadership to recognize that no amount of money should be spared for the benefits of today's healthy living, since they determine the priceless health and wellbeing of not only today's generation of living individuals. It turns out to be a challenge for the majority to image instead, that today's *priority* for healthy living has far going implications for the health and the even the BIRTHRIGHT of offsprings for generations to come - if any may be born and birthright(!) among generation of grandchildren of today's adults, whose fertility is in question unless the major special effort is made to assure for that and after this pivotal long, for the following generations of human beings (according to 60+ global studies, "COUNT DOWN") And this collective Blindspot had been leading both individuals and humanity at large to rapidly increasing and yet preventable suffering from the agony of pain and losses of dear ones, due to the lack of the skills for self awareness and self mastery over ***the subliminal self defeat and harm patterns*** (resulting from brain underdevelopment, due to the key developmental flaw of the currently dominant curriculum, limited from fostering WHOLE BRAIN, BALANCED cognition with the use of curricular for teaching the skills for harnessing Music instinct, based on the transformative impact of joy neurochemicals, capable to foster self propelled evolution of the evolution human brain, thanks for vibrational nature of all intracellular processes in our body, described by Prof Candace Pert in her bestselling book "Molecules of Emotion"). These widespread trends in underdevelopment of the brain had been leading to multigenerational

zombification and warped priorities among humanity, penalizing the dangerous level of dominance of the detachment from emotional reality and warped priorities for the universal biological needs and top priorities for assuring **HEALTHY DWELLING IN MAN MADE AND NATURAL ENVIRONMENTS** over any other social pressures to lower moral and ethical values.

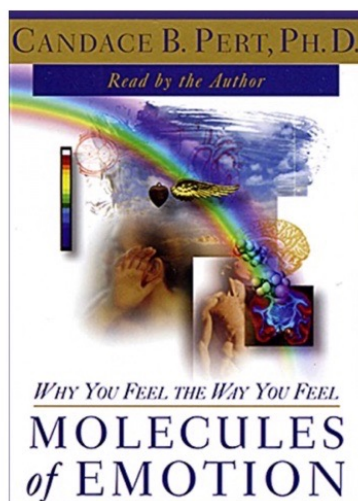

The latest USA elections'2024 brought to light the sobering information that has traditionally remained in the shadows, away from the public media spotlight: Both candidates for the **top political leadership from Democratic Party Kamala Harris as the presidential candidate and and her running mate for vice president's position Tim Walz** struggled with **INFERTILITY**. But even this global spotlight on high level of celebrity-victims of this growing environmental illness is yet to result in the top focus by political leadership on the shocking trend of forecasted by 60+ global studies fast approaching painless onset of *Global Zero Sperm Crisis* along with the collapse of the society from widespread agony of pain among population from toxicity-caused illnesses, knocking out more victims than those people healthy enough to be able to take care of the sick... This state of

zombification led to the similarly shocking audacity of lack of public health warning about learning the methods of detoxifying all parts of our living, when the media brought into spotlight cancer diagnose or **princess Kate Middleton**, threatening for the first time to turn her three young kids into Royal orphans along with the evident susceptibility to cancer among their offsprings.

This state of denial of the screaming of catastrophe data on the rapid increase of various environmental illnesses - left unlabeled as such by the medical industry, focused on profiteering from the suffering of millions of people, is based on dangerous illusion re indiscriminate nature of this fast growing trend. And the key reason for such sleepwalking through the fast lane into self demise of humanity is habituation to anthropogenic, man-made/caused toxicity resulting from **DEACTIVATED PAIN ALARMS TO TOXICITY** - the observed by Ms Gutman form of zombification that is the key component of the unrecognized state of widespread environmental insanity, indiscriminate of most leadership, lacking intellectual leadership based on the dysfunctional self preservation instinct, that warped prioritizing scale for nonnegotiable aspects of human health.

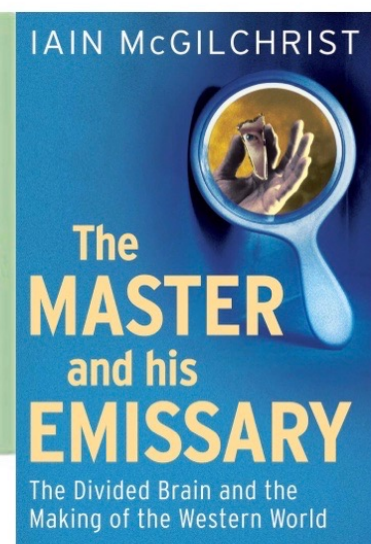

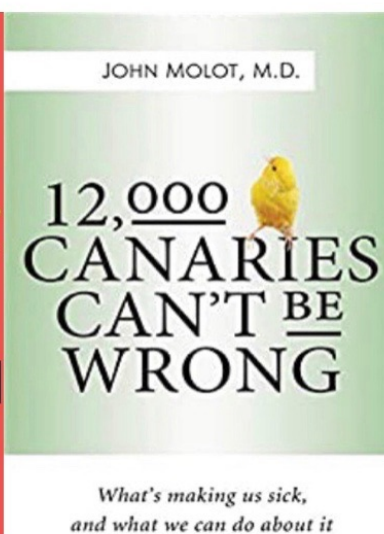

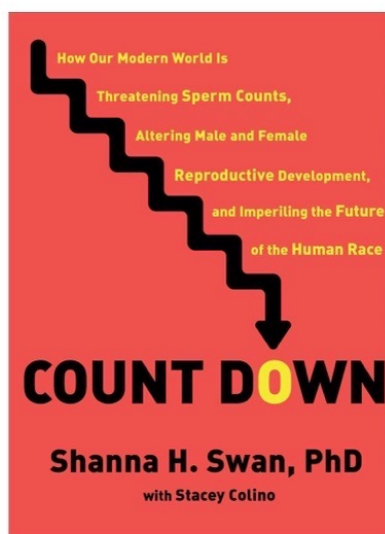

But Rosalina Gutman's personal experience of having to live with the painful gift of MCS is evident of being the much needed hope for the humanity in this rather grim situation that our generation is bound to recognize and face with sober acknowledgment of the inconvenient truth and the ways to foster self mobilization of the society to prevent collapse of civilization by the global threats through improving brain function and learning to observe and overcome instinctive incivilities rooted in evolutionary relics of the human mind. The above aspects of today's reality are directly linked to the dangerous for health and safety collective Blindspot of lacking personal capacity to detect and avoid dangerous for ALL toxic chemicals. And at the same time, there is no information about the hope for humanity to overcome rapidly unraveling environmental health crisis, that is possible with the engagement of leadership members at all levels with individuals in possession of still rare painful gift of MCS(!). These issues and other multidisciplinary implications of Bach-based discoveries are covered in more detail in the ebook by Ms Gutman available - now for instant download.
