PART 3C

▲ Supplemental hate incidents report

**ENDLESS OUTCOMES OF
BETRAYAL BY THE CHARMING
PREDATOR IN MEDICAL UNIFORM
CADY & HER COCONSPIRATORS
(FOR INCIDENT POLICE REPORT
#LHS0191)**

Since at first I could not imagine that a seemingly nice woman in nurse's attire could be capable of the brutal, menacing act of cruelty of denying my life threatening illness, I thought she was not merely aware of what was written under her name. But since I had no way to contact her but through the same platform, I decided to warn Brianna. And when I called her, she picked up the phone - FOR THE FIRST TIME AFTER OVER THREE MONTHS of our interaction while waiting for urgent(!) help... I explained my concerns and told her to call nurse. Cady and to keep detailed notes for her self about what took place in actuality. I urged but to file complaints about the ethical violations. But our conversation was very short, since she told me that she had to go to another client for the scheduled appointment... And since that time I had never heard anything from Brianna regarding the COMPLAINT. I was in the state of shock for a number of days and was not sure what to make of the audacity.

Meanwhile, I was trying to empower Nurse Cady with additional info re MCS illness that she could use to make corrections to the fraudulent diagnosis. But that never happened even after she acknowledged receipt of mailed by me book by **world authority on MCS and advisor for Canadian government Dr Molot, discussing his research on thousands of MCS patients "12,000 canaries can't be wrong" published in 2014, while his practice kept growing from thousands of more patients...** The book also warned about the danger for ALL from hard to identify with sensory alarms chemical toxicants, while they lurk with cumulative effects and lead to terrifying results - cancers, birth defects, heart attacks, strokes, autism, and multitudes of other PREVENTABLE (!) ENVIRONMENTAL illnesses - however, not labeled as such(!)

After Nurse Cady shared her verbal expression of gratitude for learning of health dangers from me, I was in the state of real shock and disbelief from reading filled with blatant expressions of cruel denial of everything we've discussed with her - prior the intrusion of bullies from code enforcement led by Luis Flores... But, she made no changes even upon receiving (reading ?) this book with much of evident info on MCS. The state of certainty about the entitlement to issue the death sentence with fraudulent diagnosis had petrifying impact from realizing that I was dealing with notorious d manipulative criminals operating as the ring... This sense of being trapped and engrossed by the slime of evil became even more clear when I dared to see again Brianna, meeting on 8.25.25 with me finally - after 3 weeks(!) from the catastrophic for my health problem, while demonstrating completely unapologetic attitude for what she led to her with own actions of betrayal of sanctity of my life, and then, failed to report it afterwards - deliberately and despite her duties. She had a nerve to behave, AS IF she didn't do anything to contribute to the terrifying for her client outcome - facilitating intentional set up for no chance for getting relevant help with recovery from misstated life threatening illness - with no shadow of regret, issued in cold blood... If in fact my car would not be repairable, and the criminals would follow the green light from the given to them fraudulent diagnosis to do what they intended to me, in disregard to my medical necessities, I would not be alive by now(!)... She however, didn't reveal any feeling of remorse or even regret about these circumstances. And, she kept poker face when I explained how the time stamps gave away the scam of creating the medical fraud. Instead of concern, that her company's name proclaimed in its name, she made a few menacing remarks, revealing her thirst to show her upper hand and assert her power

over a scholar, whose ideas she could hardly follow, despite patient repetition of them by the patient teacher, despite the fact, that the involved subjects she and other classmates of hers should have learned at her college, but did not... (She wasn't an exception in this from most of counselors who aren't trained in alignment with primordial paradigm of vibrational nature of all processes in our body,

regulated by matching vibrations at the opioid receptors of the cell for the flow of neurochemicals (as in **“Molecules of Emotions” by Prof Pert, released in 1898(!) with Forward by Deepak Chopra.** Her discovery of opioid receptor gained Nobel prize. And one of the most regrettable for me things is that, my turn-key application for using rediscovered tools of Bach for self reflection could have helped her overcome cognitive dissonance. But this completion of this hands on part demands for the use of piano...)

Why was this inept and primitive creature so cruel and felt being above the law in her shockingly easy to detect conspiracy to assign me the fate of destined to suffering hostage of her predatory mind? How could the scenario of the fairytale about the Giant being captured by Lilliputians manifest into reality of unprecedented 3 years-long unapologetic torture and with no hope to overcome the culture of moral atrocity of her agency?..

I asked her to think about the answer to the question **“What does this normality of culture of moral atrocity mean in context of her own state of slipping into the same state of chemical intolerances while complaining of allergies at fairly young age, evident of already high intolerance to toxicants ?”** But, her bias was really tough learning barrier for her ability to grasp how close she is to becoming disabled by similar illness ... Earlier I warned her to look up on Google the meaning of Milgram effect about the pressure from authorities to lower moral values for administering torture. But I doubt she did. although she could have understood how she began practicing self defeat along with criminal misconduct of facilitating retaliatory medical fraud...

Besides, her illusory position of having upper hand over her victim brought up the dark side of

her - the cruelty of the excusiology to dismiss this and anything else I said. She felt being absolved and didn't feel obligated to provide any answers to me, just like the rest of this ring notorious frauds...

*And, this effort of sharing this shocking experience is to help you, dear readers, to picture what it would feel like, **when you will be likely be treated in the same hideous way, when you and your loved ones would become disabled by illnesses, caused by environmental toxicants, due to the mere fate of being born and living at the age of COUNTDOWN2045 to prevent onset of human extinction?..***

Witch-hunt with collective hate crime against the catalyst of change against indiscriminate threat of chemical toxicants

DAILY HATE CRIME, CHEERED BY THE COMMUNITY, BRAINWASHED INTO HARM AND SELF DEFEAT BY BLINDSPOT OF THEIR INEPT AND IMMORAL LEADERS

Meanwhile, sudden reappearance of Jimmy and William revealed that they were a part of community discussion about the ongoing hate crime that began unraveling immediately after my car was fixed with my arduous efforts and with no help, but despite all odds

The very day after the car was fixed, the woman who dropped squirrels once in a while, showed up with squirrels and had not missed a single day... I have not discussed it with any but wicked guys from Park Maintenance dept. It means that they incited the woman appealing to her own biases.

And she was gleaning with pleasure while hearing my complaints about suffering and was deaf to my pleas for compassion...

Here are a few examples of these shocking daily(!) acts of incivility: WATCH VIDEOS:

- Local Woman speaks re permission from Park Dept to release squirrels 2feed coyotes in this park no exception

FURTHER EMBOLDENED EVIL PARK MAINTENANCE REP DANNIE DELSI

Likely those who know Dannie Delsi through work, perceive him as "a decent guy with polite manner", but don't realize that he hides his rather weird and abusive nature of macho guy, that

he cowardly enjoys to demonstrate, when no one watches, by victimizing people who are not in the position to put up defense from the bully. And he got the green light for senseless bullying with fraudulent diagnosis - his harassment got emboldened now: Among his sickening acts of acting out his ill-minded thrill of showing who is the boss is this act of intentional blocking of the disabled parking from the use and then again blocking it from car's exit from the parking. Before I had to engaged into interaction with him for having to ask him to move his truck, he saw my car stopped and waiting for a while, but he stained at me and would not move nevertheless. The park was empty. And No one was in the park for him to interact at the entire time he was there. That is one of his ways of claiming his entitlement for abuse, among other numerous acts of incivility. Otherwise he had no reason to be there since there is adjacent large and mostly empty parking lot.

Events of notable link to the outrage of assault to cause harm with unprecedented cruelty

- **8.21.2025 Thursday** In the morning I was suddenly approached by officers Eapinoza and Vigil, who announced a shocking fact: Park employees made false complaints re “harassment” against me, demanding for him to arrest me and take me to psychiatric ward - FALSELY and based on the FRAUDULENT DIAGNOSIS that they were personally motivated to concoct in collaboration with their cronies(!) Officer Espinoza fortunately handled appropriately: He was outraged by the scandalous FALSE accusations, stating that her personally knew me and found such attempt to assassinate my character to be abhorrent, refusing to pursue this lead, that would force him to commit a crime with potentially lethal outcome for me. They were joined by several other officers and began searching for the solutions for some of the long awaiting problems. (But it is unclear if any progress had been made yet - no one contacted me after several days so far...)
- **8.24.2025 Monday** I came to use the bathroom eagerly waiting for the opening of the park at 9:00 am but as often it was CLOSED. I had to wait for 40+ min for the opening to get access to vital for health needs. I've asked the park administration to find someone local to open the park. For example, why can't the graders open the bathroom of one of them comes daily to blow the leaves (although no need for it exists, but the clouds of dust are raised making intolerable the stay in the park for all, and dangerous(!) for ppl with respiratory conditions). I've spoken about this many times too... Thus such actions are no less but intentional. And this adds the key fact - motivation to accuse of “insanity” someone who counts on the announced park schedule and had been harassed for that a number of times (other details will be provided in additional Volume - sign up for newscast on
- This below gardener with leaf blower was cooperative among the rest in the recent past but after the late opening of the park and no apology from his boss Andrew, he is involved into hostility as well. Just 15 min prior another one came and blew leaves as well (that one comes daily to terrorize me and force me to leave in panic since his appearance is hard to predict.

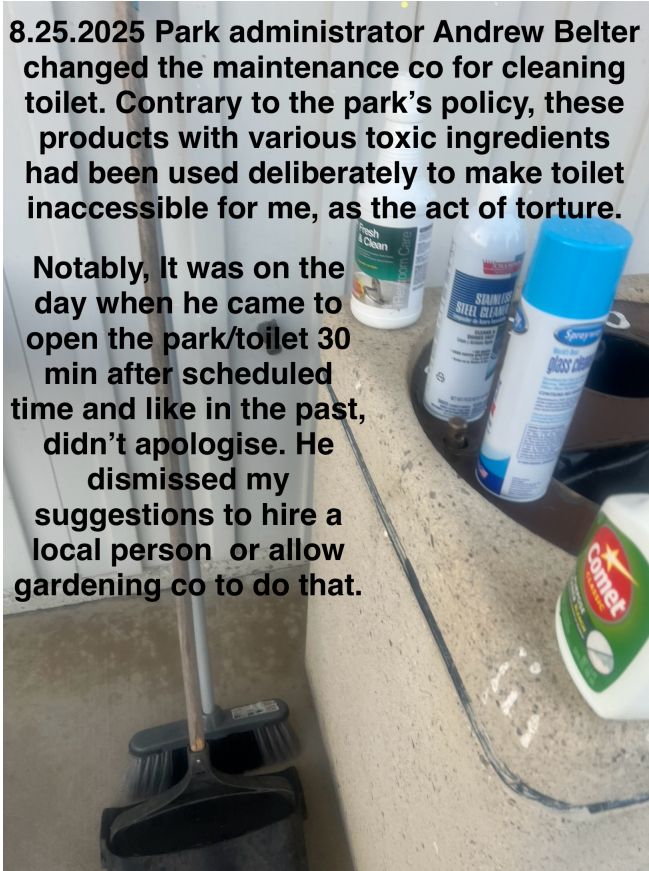

Why and how the leaf blowers became legalized after being banned in CA city environment remains a mystery of this hazard being perpetrated at the terrible cost of health

Meanwhile after “hard” work of “tiring and exhausting 20 min” everyone deserves to take rest for hours, since whether they work or do not doesn't matter anyway...

8.24.2025 Monday After expression of the concern by several police officers on Thursday 8.21.2025, I assumed that someone within police would begin to handle the

8.25.2025 Park administrator Andrew Belter changed the maintenance co for cleaning toilet. Contrary to the park's policy, these products with various toxic ingredients had been used deliberately to make toilet inaccessible for me, as the act of torture.

Notably, It was on the day when he came to open the park/toilet 30 min after scheduled time and like in the past, didn't apologise. He dismissed my suggestions to hire a local person or allow gardening co to do that.

problems of deliberately created paralysis in all parts of my life - in addition to intolerable suffering from illness while with no housing for isolation from chemicals(!) But instead I've just learned that the problem just gets recycled in the vicious circle: Instead of any tangible action, Jimmy and William came suddenly today. And instead of concern for MY COMPROMISED HEALTH, they were concerned about own cover up. They came since badly needed the proof of the same wicked liability issue - to prove that I've refused their offer of housing in hotels. And I had to repeat that accommodation for MCS disability is often impossible in such settings and needs different approaches. This subject was discussed again and again since 2022, but nothing had been done to change the problem in a reasonable manner. However, police was trying to make contacts to with Luus Flores to remove tickets resulting from being targeted by parking enforcement, in order to allow for the car registration. But no, this was NOT of the concern of Jimmy and William since they were told to get the response that could be misrepresented to the convenience of COVER UP for all involved for three years and failed in reasoning, and practicing together shocking cruelty individuals, led by bureaucrats with no concern employed under the name "People's Concern".

Meanwhile one of them are capable of picturing self and own children in the same situation of being criminalized for being sick with rapidly increasing illness - thanks to their personal contribution to the culture of moral atrocity they have no incentives to break due to the illusion from privileged position of power they are encouraged to misuse by IMPUNITY, and by now are used to their normality of immoral behavior while

taking advantage of the least privileged, the weakest and the poorest. The experience proved that each of the agencies involved needs independent supervision and auditing due to the engrained culture of systemic practice of injurious harm and betrayal of public interest along with power abuses throughout all parts of operations

- **Monday 8.25.2025** Park administrator Andrew Belter changed the maintenance co for cleaning toilet. Contrary to the park's policy, these products with various toxic ingredients had been used deliberately to make toilet inaccessible for me, as the act of torture. Notably, It was on the day when he came to open the park/ toilet 30 min after scheduled time and like in the past, didn't apologize. He dismissed my suggestions to hire a local person or allow gardening co to do that, despite several of my requests in the past... The new cleaner closed bathrooms an hour prior to the park closure and yelled at me, demanding that I don't stay in the toilet for longer than 5 min. making me frightened to merely attempt to use facility... Another local resident came to walk the dog and needed to use the bathroom but could not. Complaint from her to the city was left with no reply and dismissed as of the access to bathroom was "not a health and safety issue".
