

# Sawtooth Star Block

## Cutting for the 12" Star

From Background Fabric:

- Cut 1, 3 1/2-inch strip.

From that strip cut 4, 3 1/2" x 6 1/2" rectangles and  
4, 3 1/2" squares

From the Star Points Fabric:

- Cut 8, 3 1/2-inch squares

For the star center you will use the 6 1/2-inch star block

## Piecing

**Step 1** Position a 3 1/2-inch star points square on the corner of a 3 1/2" x 6 1/2" rectangle. Draw a diagonal line on the square and stitch on this line. Trim the seam allowance to 1/4-inch, and press. Repeat this process at the opposite corner of the rectangle. Make 4.

**Step 2** Sew a Step 1 unit to the top and bottom of the 6 1/2-inch square (or small star block) and press. Sew the remaining 3 1/2-inch squares to both ends of the remaining Step 1 units. Sew these units to the sides of the star block and press. The block should measure 12 1/2-inches.
