MYERS® ME SERIES

Effluent Pumps

The Right Choice

The Myers ME Series effluent pumps are designed specifically for today's effluent pressure distribution mounds, trenches and high flow drainage applications. The ME Series effluent pumps with their efficient two vane, enclosed impellers, provide the ideal performance for optimum dosing. ME Series pumps are constructed of only corrosion resistant materials like cast iron, stainless steel and thermoplastics to assure that they will perform for years to come in the harsh effluent environment and drainage applications. Pump Features and Applications

- A. Power Cord**
Jacket sealed with compression fittings. Individual wires potted with epoxy to prevent wicking in case of cord damage.
- B. Motor Housing**
Cast iron for efficient heat transfer and corrosion resistance.
- C. Bearings**
Upper and lower ball bearings support rotor. Take radial and thrust loads.

- D. Motor**
1/2, 3/4, 1 and 1-1/2 HP single or three phase. 60 Hz, 3450 RPM. Single phase PSC motors have built-in on winding overload protection, oil-cooled and lubricated.

- E. High Efficiency Cast Iron Volute**
Corrosion resistant. Passes 3/4" spherical solids. 2" NPT discharge.

- F. Volute/Impeller Seal Ring**
Maintains high efficiency and reduces recirculation. Replaceable.

- G. Enclosed Two Vane Impeller**
High efficiency. Passes 3/4" spherical solids with stainless steel wear ring. Optional bronze construction available.

- H. Shaft Seals**
Carbon and ceramic faces. Optional dual tandem seals. Extends motor life.

- I. Seal Leak Probes**
Optional probes (dual seal only) detect water leakage in seal housing. Activates warning light.

Ideal For Use In Mound And Trench Pressure Distribution Systems.

- High efficiency, two vane, enclosed impeller provides ideal performance for most efficient dosing.
- Impeller passes full 3/4 inch solids.
- Enclosed impeller design eliminates possibility of jamming or corrosion between impeller and volute.

Durable Motor Will Deliver Many Years Of Reliable Service.

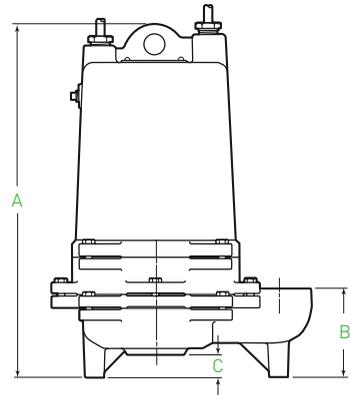

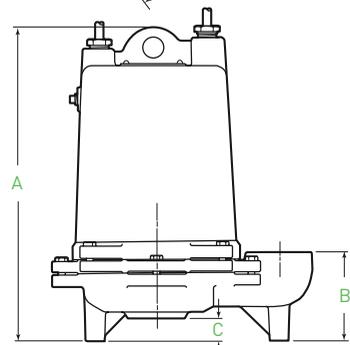

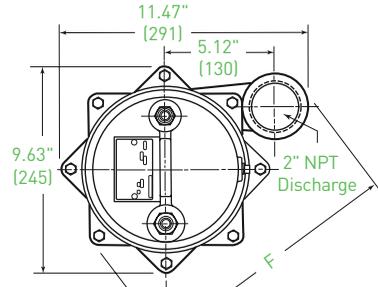

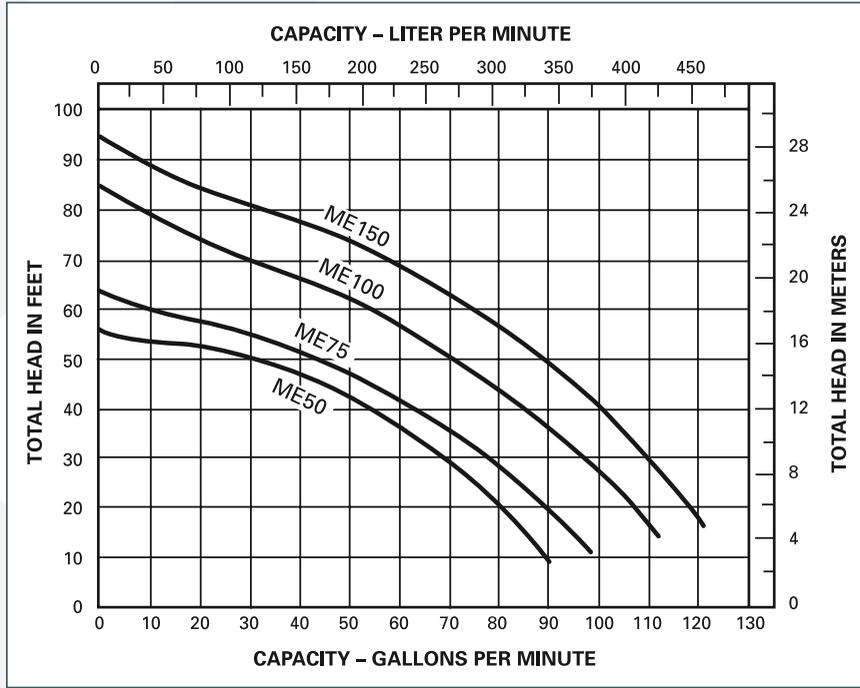

- Oil-filled motor for maximum heat dissipation and constant bearing lubrication.
- High torque, permanent split capacitor (PSC), single phase motors. No starting switches or relays to wear out.
- Optional seal leak probe warns of seal leak condition. (Dual seal motors only.) Helps prevent costly motor damage.
- Motors have on winding current and temperature sensitive overload. (Single phase only.)

The Me Series Effluent Pumps Are Designed For Years Of Maintenance Free Operation.

- Volute seal ring is replaceable. Restores pump to original performance if wear should occur.
- Motor is held in place by four screws. Easily removed if service is ever needed.
