levantesystems.com

Website

We install and organize technology infrastructure to support secure, reliable operations. We serve small businesses, retail locations, offices and homes, and provide on-site technical support for companies with projects in Puerto Rico.

CORE COMPETENCIES

Troubleshooting and problem resolution

Root-cause analysis and resolution of network, camera, computer, printer and technology equipment issues.

CCTV and video surveillance

Design and installation of IP and analog cameras, recorders, storage and remote viewing.

Networks and cabling

Network cabling installation, termination and testing; Wi-Fi, routers, switches, racks and equipment organization.

Access control

Readers, locks, exit buttons, relays, doorbells and component integration.

Integration and subcontracting

Installation, site visits and documentation for integrators and service providers with projects across the island.

SELECTED SUBCONTRACTING EXPERIENCE

Services performed through other companies, acting as a subcontractor.

Commercial | Walmart and Burlington

Technical services and on-site support at retail locations.

Federal | USDA and USPS

Services at U.S. Department of Agriculture (USDA) and U.S. Postal Service (USPS) facilities.

LOCAL SUPPORT FOR FIELD PROJECTS

Based in Juana Díaz, we prioritize southern Puerto Rico, from Mayagüez to Arroyo. Installation and service in other locations are coordinated according to project scope.

Ideal for: small businesses and retailers that need reliable infrastructure; integrators seeking local technical personnel in Puerto Rico.
