

PRIVATE VILLA

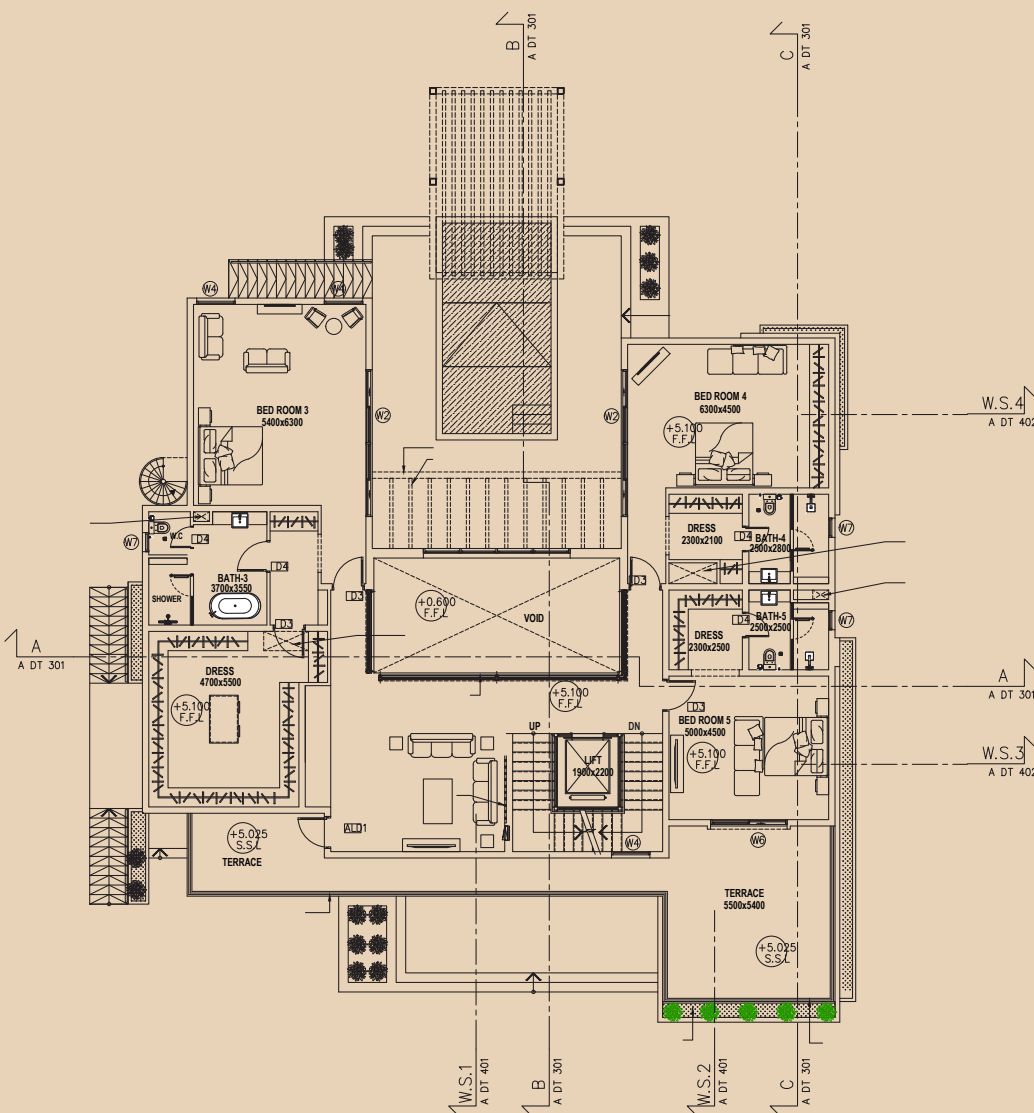

TYPE - RESIDENTIAL
LOCATION - DUBAI, UAE
YEAR - 2022

“ I took part in the design process of a private residential space located in Dubai, United Arab Emirates. Main purpose of the project was to provide a plan concerning the Arabic living spaces, the privacy, and the middle east climate that leads us to create a layout which the client can live with her parents and her husband. To be able to reach this goal, we designed a comfortable space for elder people on the ground floor and a large bedroom space + dressing area on the first floor. We placed additional bedrooms for future members of the family. For privacy purposes, we came up with an enclosed setting out plan that the main openings are from the inner part of the house. The budget was limited so we had to concern the future expansions that will be added the villa. ”
