

This morning the AT&T Southeast, Utility Operations, and AT&T Billing bargaining teams, along with the Wire Tech and Consumer subcommittees continued to work on preparing our bargaining proposals. This afternoon, the teams and subcommittees met with staff from the Research Department at CWA Headquarters to discuss wage increases, benefit costs, economic trends, and other important information that will help to guide our efforts at the bargaining table.

We want to thank all the members across District 3 for your strong support and all of the mobilization that's taking place. We are scheduled to meet with AT&T's bargaining teams on Tuesday, June 25th to officially start contract negotiations. We will distribute our next bargaining update after our meeting with the company.
