

## **CWA Bargaining Update #6**

The CWA/ATT Southeast bargaining team and Company met today. The Company rejected some of the Union's proposals regarding converting Wire Technicians to the Services Technician title, extra vacation time, protecting chat/digital call volume, increasing Term Pay allowance options and others. The Company made counter proposals to our Evening/Night Differential proposal and our Uniform proposal by attempting to eliminate the SE BST Core Uniform Program. We made another proposal to move all Wire Technicians to the BST core agreement and upgrade the wages. We rejected the Company's proposal to expand the Wire Technician's scope of work and rejected the company's absurd proposal from yesterday that was to work Wire Technicians in higher rated work for an insulting differential. CWA's chair let it be known that the company's proposal regarding that was an insult to our members.

Stay organized, stay ready, stay strong!
