

Monarch Behavior Solutions Announces National Accreditation

Prestigious Distinction Granted by Behavioral Health Center of Excellence

Atascadero, CA — 07/27/2018 — Today, Monarch Behavior Solutions announced that they have been granted accreditation by the Behavioral Health Center of Excellence, naming Monarch Behavior Solutions a Behavioral Health Center of Excellence and thereby establishing the central California-based practice as a preeminent provider of behavior intervention services across the nation.

To become accredited, providers are evaluated in forty areas of clinical performance, including client outcomes, treatment quality, staff training, and caregiver satisfaction.

“This accreditation is a testament to our commitment to providing services of exceptional quality,” said Lindsey Reifinger, Executive Director, “We are humbled to join only a handful of other providers in the state of California who have this level of recognition in our field. The Center of Excellence distinction is a great honor.”

The Center of Excellence seal is reserved for the best behavioral health providers in the nation. Only a small number of providers in the state of California hold the Behavioral Health Center of Excellence Accreditation.

Founded in 2012, Monarch Behavior Solutions is a leader in San Luis Obispo County behavioral health services. The company offers Applied Behavioral Analysis (ABA) services in home, school, and center-based settings. Monarch Behavior Solutions is vendored with Tri-Counties Regional Center, is a Certified Non-Public Agency with the California Department of Education, and is accepts Medi-Cal clients. Monarch provides services to individuals age infant to adult and has recently started providing center-based services at their downtown Atascadero, California location.
