

SERVICE & SUPPORT

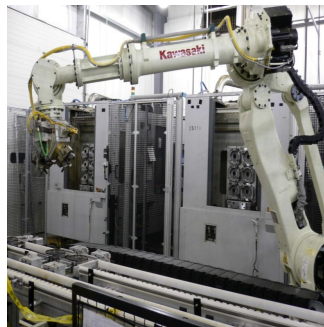

Ionic provides on-site service for existing machines, and production processes. We can provide analysis of your production equipment and processes, recommend and implement upgrades, whether mechanical, electrical or programming to improve your uptime, efficiency productivity and profit.

We maximize production from your existing assets.

We are a highly skilled resource to strengthen your team. We are on call and available 24/7/365 to meet your needs.

From spare parts to complete factories no job is too small to interest us and no challenge is too large to analyze.

Our specialists are skilled in tuning machinery and maximizing production.

Reducing Manufacturing Costs and Increasing Productivity

We can provide our clients with on-site expertise for your manufacturing needs. This includes:

- Machinery moves
- Equipment installations
- Cycle-time improvement
- Reliability improvements
- Tooling changes for new products
- Upgrades to control systems
- OEE and line monitoring software
- Re-Commissioning of systems at your facility.

Our automation expertise can reduce your costs, increase your throughput and improve your productivity. We can reduce your costs by fixing existing issues and re-using existing capital equipment.

Incremental Changes Can Provide Large Improvements

On-call, available and highly skilled, our automation experts can analyze your production needs, and existing equipment, recommend and implement upgrades ranging from simple maintenance, program improvements, hardware upgrades, changeover tooling, to new product releases, and complete plant moves.

From spare parts to complete factories no job is too small to interest us and no challenge is too large to analyze.

We have a broad range of automation, engineering and production management skills, learned over many decades of manufacturing experience. Let us help you improve your productivity.
