

TRUE LIGN GRIP INSTALL

TRUE

Make sure the clubface is square and perpendicular to the ground.

Apply additional solvent to ensure the grip can be adjusted after initial installation.

Install the grip ensuring the 2 front installation marks (end cap, mouth) are linear and pointing to a perpendicular clubface.

TRUE LIGN is located on the end cap.

Once the grip is installed, unclamp the grip and turn the grip around to inspect TRUE LIGN.

Adjust the grip as necessary to straighten the leveler with the installation marks and square club face.
