

Mission Statement

Alliance League Matching Services, Inc. (ALMS)

At **Alliance League Matching Services, Inc. (ALMS)**, we stand at the crossroads of bioethics, biotechnology, cybersecurity governance, and environmental advocacy—committed to uncovering truth, protecting human autonomy, and restoring integrity to science and technology.

Our mission is to educate, advocate, and take direct action against unethical bio-cybernetic control systems while pioneering ethical solutions in biotechnology, cybersecurity, and digital governance. Through rigorous research, investigative work, and high-level advocacy, we expose the misuse of emerging technologies, ensuring that they serve humanity rather than enslave it.

We believe in ethical innovation—biotechnology should heal, not harm; cybersecurity should protect, not control; and governance should be transparent, not oppressive. Our work bridges the gap between science, ethics, and faith, equipping communities, policymakers, and future generations with the knowledge and tools to make informed, ethical choices.

Through education initiatives, policy recommendations, public outreach, and direct action, **ALMS** is dedicated to:

- ✓ Exposing and resisting the integration of synthetic DNA into blockchain-based identity systems without education and informed consent given.
- ✓ Investigating and challenging the unethical use of AI in human surveillance, neuromorphic computing, and biometric tracking.
- ✓ Promoting non-invasive, ethical alternatives to bio-digital convergence technologies.
- ✓ Providing educational certifications, presentations, and resources for students, policymakers, and faith-based communities on biotechnology, cybersecurity, and bioethics.
- ✓ Advocating for the use of ethical precision healthcare and alternatives to invasive bio-technological systems.
- ✓ Standing against financial systems that seek to tokenize human life through biometric-based digital currencies and centralized control mechanisms.

Our volunteer-driven initiatives span across education, environmental restoration, and ethical technology policy, ensuring that scientific progress aligns with moral responsibility.

We are the advocates of critical thinking and truth in a world compromised by deception.

In the name of YESHUA, we stand for human dignity, ethical science, careful stewardship of the environment, and an unbreakable commitment to critical thinking and the truth.

ALMS is not just an organization—it is a movement. A call to action. A force for ethical revolution. 🔥

If you share this mission, join us. Support us. Stand with us. Because the future of human sovereignty depends on it.
