

High Twelve International Info Board Instructions

First, purchase the following items:

1. Elmer's three fold info board. It will cost less than 5 dollars at your Michaels or Staples store. Get one with a blue background. Black will work if blue is not available.
2. Elmer's glue stick. It will cost less than 2 dollars.

Second, download and print the info board pdf files from the High Twelve International Website. There are two file, one is in a vertical format and the second is in an horizontal format. Be sure to print them on a color printer.

The completed board is below. The vertical pages are pasted onto the left and right fold outs. The horizontal pages are pasted onto the center of the info board. The two emblems are in the horizontal file and you will need to cut them out with scissor's.

When applying the Elmer's glue to the back of the pages, it works best if you apply the glue stick from the center of a side of a page to the outside of a side of the page. If you go from one side to the other it tends to wrinkle the pages.
