

Connected government for local municipalities

This is why we built eMunicipality™.

Due to the rapid evolution of information technology and the expansion of smartphone use, local municipalities are facing an unprecedented challenge to adopt innovative digital solutions.

Regardless of their budget cuts, their organizational complexity and the IT resources crunch, local municipalities are expected to use innovative ICT solutions to serve their citizens anywhere, anytime, and on any device.

“ We believe that the future of eGovernment is in bridging the gap between governments and citizens, who want to be actively involved in their community. „

Everything you need

eMunicipality™ helps you achieve your mission – to better inform, connect with, and serve citizens. It gives you all the tools you need out-of-the-box, to bridge the communication gap with citizens.

Key benefits

- built-in CMS features
- mobile apps

Government - Grade Security

Worried about data security and privacy issues?

With eMunicipality™, you know exactly where your data is located at all times. Aware of your concerns regarding data being held by third parties, we aim at delivering on the highest security performance, following the EU Commission's guidelines on cloud computing, and partnering solely with certified hosting providers, located in your country. Personal citizen data and administrative documents are safeguarded in a private cloud.

“ We use the most secure private cloud and bank-standard security. „

E-government as a Service

eMunicipality™ enables thousands of public administrations to deliver online services easily, smartly and efficiently. No lengthy software implementation, no expensive licenses or IT infrastructure involved. Sign up, customise, and bring all public services online - secured in a private cloud, accessible via any browser or mobile device.

We offer a unique cloud-based digital solution, including the following features

Citizen Service Quality

- Two-way communication channel with citizens
- Citizens have access to information and services anytime and anywhere
- Citizen services are integrated with digital media

Security

- Secure and compliant local private cloud
- Personal data protection
- Continuous monitoring

IT Management

- 24/7 support
- Robust solution with best-in-class scalability and performance
- “Future proof” adaptability through flexibility and extensibility

Content Management

- Design information architecture easily
- Launch content rapidly
- Manage web content workflow seamlessly

About Kratos Technology

At Kratos Technology, we develop SaaS solutions, which enable faster, cheaper and easier online services between local governments and citizens.
