

Letter of Engagement

Our licensed team of seasoned engineers, with a combined 60+ years of experience in the field of energy conservation and generation, operate from a technology and company neutral position. This allows us the freedom to provide unbiased recommendations on energy savings that are in your best interest. We will manage your transition to renewable energy through effectively applying technologies, products and services to reduce your energy footprint. To do this, we provide a personalized turnkey service that will:

- Evaluate your home and lifestyle to determine your accurate energy use profile
- Recommend vetted products and services when cost effective energy savings can be achieved
- Use industry best practices to design a solar solution that *correctly* minimizes your electricity bill
- Secure the best quote for your review by brokering your required solar solution with vetted, highly rated local professional installers that are best matched to your project's requirements
- Manage your project from start to finish
- Provide you with ongoing complimentary energy support services following project completion

We are funded by the companies that we recommend and that you choose to move forward with. This results in our being able to offer our personalized service to you at minimal cost. From our first meeting through to providing you with recommendations that include products, service providers and the *correct* solar system quote, we will spend a minimum of 15-20 hours in order to design and deliver the perfect solution for you. Therefore, in order to provide you with this customized concierge service, we ask that you:

1. Sign below to acknowledge your engagement with us and authorize us to act on your behalf
2. Provide us with exclusivity so we can negotiate the best pricing from required vendors
3. Provide Your Energy Pros with a \$500 good faith retainer

The \$500 retainer will be applied towards your project if you move forward with our recommended solar provider.

If you are in doubt as to the exceptional level of service and value we provide, please review some of our many happy client testimonials at <https://youenergypros.com/client-reviews-1>

We look forward to providing you with this same level of exceptional service.
