All the world is dressed in green;
Many happy birds are seen,
Roses bright and sunshine clear,
Show that lovely June is here."
- F.G. Sanders

GEMSTONE OF THE MONTH

June is a special month when it comes to gemstones! June's gemstones include the pearl, moonstone, and alexandrite, all elements of the sea. Pearls possess a uniquely delicate translucence and luster that place them among the most highly valued of gemstones. Moonstones mimic the moonlight and if you turn the stone is moved back and forth, the brilliant silvery rays appear to move about, like moonbeams playing over water. Finally, alexandrite possesses an enchanting chameleon-like personality changing colors depending on the lighting.

If you are looking for any type of event planning, why settle for anything short of Pristine?"
