NEWSLETTER

At Community Link, we believe that education is the foundation for unlocking potential and fostering long-term progress. Our programs are designed to support young families by equipping them with essential knowledge and skills for success.

Bringing You Closer to What Matters

Welcome to the first edition of Community Link's newsletter!

As the founder, I am excited to lead a dedicated team committed to expanding opportunities and nurturing growth in our community.

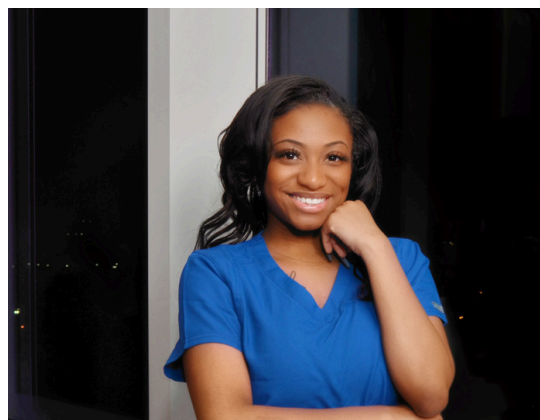

Our mission is to develop engaging educational programs that inspire growth, build confidence, and create brighter futures for young parents who lack formal and informal support system.

Community Link exists to bridge support gaps that hinder educational and growth opportunities for young parents aged 16 to 24. We are focused on guiding these parents through challenges related to education, employment, childcare, and access to vital resources. By tackling these obstacles, we work to disrupt cycles of generational poverty, foster growth, and promote upward mobility. We have developed the campaign 'A Day in Their Shoes' in response to the growing need for awareness and actionable solutions to support young parents facing significant challenges.

We invite you to be part of the change.

We are excited to offer public classes designed to equip participants with essential skills and certifications for personal and professional growth. All classes are approved for continued education hours for ongoing professional development and are acknowledged by the Wisconsin Department of Children and Families.

How Your Involvement Helps: By enrolling in our classes, or making a contribution of a one-time or recurring donation to support our program. You play a crucial role in advancing our mission to provide accessible education and support to those we serve. Your participation not only enhances your professional journey but also sustains initiatives that create skill-building and growth opportunities for young parents, while offering them the support they need.

Public Classes:

- Abusive Head Trauma (AHT)
- Sudden Infant Death Syndrome (SIDS) Prevention
- Mandated Reporter Certification
- First Aid, CPR, and AED Training
- GED Prep Program

These courses are designed for parents, caregivers, and professionals looking to continue their education and enhance their skills. By participating in these classes, you will:

- Acquire essential skills to improve child safety and well-being.
- Meet professional certification requirements.
- Enhance your employability and career opportunities.
- Earn widely recognized credentials accepted by employers and industry organizations.
