

# BRIGHT FUTURES HANDOUT ► PARENT

## 4 MONTH VISIT

Here are some suggestions from Bright Futures experts that may be of value to your family.

### ✓ HOW YOUR FAMILY IS DOING

- Learn if your home or drinking water has lead and take steps to get rid of it. Lead is toxic for everyone.
- Take time for yourself and with your partner. Spend time with family and friends.
- Choose a mature, trained, and responsible babysitter or caregiver.
- You can talk with us about your child care choices.

### ✓ FEEDING YOUR BABY

- For babies at 4 months of age, breast milk or iron-fortified formula remains the best food. Solid foods are discouraged until about 6 months of age.
- Avoid feeding your baby too much by following the baby's signs of fullness, such as
  - Leaning back
  - Turning away

#### If Breastfeeding

- Providing only breast milk for your baby for about the first 6 months after birth provides ideal nutrition. It supports the best possible growth and development.
- Be proud of yourself if you are still breastfeeding. Continue as long as you and your baby want.
- Know that babies this age go through growth spurts. They may want to breastfeed more often and that is normal.
- If you pump, be sure to store your milk properly so it stays safe for your baby. We can give you more information.
- Give your baby vitamin D drops (400 IU a day).
- Tell us if you are taking any medications, supplements, or herbal preparations.

#### If Formula Feeding

- Make sure to prepare, heat, and store the formula safely.
- Feed on demand. Expect him to eat about 30 to 32 oz daily.
- Hold your baby so you can look at each other when you feed him.
- Always hold the bottle. Never prop it.
- Don't give your baby a bottle while he is in a crib.

### ✓ YOUR CHANGING BABY

- Create routines for feeding, nap time, and bedtime.
- Calm your baby with soothing and gentle touches when she is fussy.
- Make time for quiet play.
  - Hold your baby and talk with her.
  - Read to your baby often.
- Encourage active play.
  - Offer floor gyms and colorful toys to hold.
  - Put your baby on her tummy for playtime. Don't leave her alone during tummy time or allow her to sleep on her tummy.
- Don't have a TV on in the background or use a TV or other digital media to calm your baby.

### ✓ HEALTHY TEETH

- Go to your own dentist twice yearly. It is important to keep your teeth healthy so you don't pass bacteria that cause cavities on to your baby.
- Don't share spoons with your baby or use your mouth to clean the baby's pacifier.
- Use a cold teething ring if your baby's gums are sore from teething.
- Don't put your baby in a crib with a bottle.
- Clean your baby's gums and teeth (as soon as you see the first tooth) 2 times per day with a soft cloth or soft toothbrush and a small smear of fluoride toothpaste (no more than a grain of rice).
