

## SDMS - School Door Monitoring System

### 24/7/365 Monitoring

#### Automate Your Door Monitoring

Monitor all of your perimeter doors and be alerted when a door is breached or left opened. Doors are classified as public or secured. Public doors have timers built in to notify if a door has not closed after been left opened. Secured doors notify immediately.

#### Customize Alerts For Every Door

Each door can be customized for access timeouts, alerts destinations and whitelisting for normal access.

#### Tier Alert System

Alerts come in 4 tier levels. As you increase in tier levels the tier below options are included.

- 1.) SMS and emails alerts only
- 2.) Audible Buzzers at 108db play
- 3.) Strobes Flash
- 4.) Overhead Paging (Need VoIP Phone System)
- 5.) Panic buttons to activate alerts

#### Remote Notification Of Breach

Notify your security resource officers, principals, etc with group notifications and even receive alerts when door status has returned to a closed state.
