Temperature Monitoring System

24/7/365 Monitoring

Automate Your Cold Storage Monitoring

Monitor all of your cold storage and be alerted when a threshold is reached. Receive a SMS text message or email when your defined temperature ranges are exceeded.

Customize Alerts For Every Location

Each cold storage location can be customized for alerting personnel responsible for that location. Also be notified when your environment returns to normal/desired ranges.

Door Monitoring

Also verify that a location does not have a left open door. Get alerted after a desired time. Be able to reach out to the personnel and correct the problem.

Reporting

Build daily, weekly or monthly reports to analyze critical data for problem identification.. Reports can be automated and sent on a configurable schedule. PDF's or html format.
