Leverage your network

Built-In Enterprise Services

VoxIP

Global Services For Your Corporate Environment

Conference Bridge

Professional conference bridge services for your company. The exact same services you have to pay a third party service is built into your VoxIP system. Conference admin, pin access, conference recording, enter and exit attendee notification, control talkers, size of conference and many more options. Users can be granted admin rights to create and modify conferences,

Call Recording

Provides the ability to record any call externally or internally. Call recording also be based on call direction for more granular customization. If enabled the system can provide dynamic call recording during calls as well. Calls are saved on system as wav files for easy documentation and emailing as an attachment.

FAX Server

Allows for inbound to email delivery. Faxes are PDF or Tiff attachments on delivery. Users can also send outbound faxing via web portal on system. Easy configuration for group inbound fax delivery as well.
