IP CONVERGENCE
Leverage your network

Law Enforcement Module
VueIP

Provide Live Video Access To Law Enforcement

Law Enforcment Can Access Your Video Surveillance in three ways

- From their 911 Operating Centers
- Roaming Patrol Units
- SWAT or Tactical Deployments

Provide Response Personnel With An Advantage

Situational awareness gives your response agencies a massive advantage in engaging suspects in your building or facilities.

Panic Buttons Work With Camera Locations

If customers deploy our SIP panic buttons you can provide location information dynamically to emergency responders. This increases emergency location identification for your local responding authorities. Great for multi campus environments.

911 Call Centers

All authorties access to view real time video feeds from your location to assist in first responders. This gives trained communication experts detailed information about your emergency.
