

### Veterinary Statement

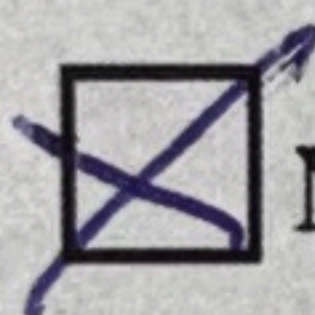

*This statement only describes the physical findings seen on the day of the exam. Radiographs are available on the dropbox link, but findings/readings are not described on this statement. This statement DOES NOT replace a Pre-Purchase Exam by the Licensed Veterinarian of your choice.*

Horse Name: Cunner

Exam Date: 10/10/25

	Yes	No
Pulse and Respiration normal?	X	
Eyes clinically normal?	X	
Temperature normal?	X	
Teeth and bite clinically normal for age? (Normal, defined by AAEP - teeth have occlusal contact between upper and lower central incisors)	X	
Any evidence of laminitis, club foot, or P3 rotation?		X
Evidence of colic surgery?		X
To your knowledge or observation, has the tail been medically altered?		X
Evidence of nerving?		X

For horses over 12 months of age, please trot the horse both directions and describe any **abnormal physical findings** below OR

NO SIGNIFICANT ABNORMALITIES NOTED

#### Stallions Only

If horse is *over 12 months* of age, are both testicles descended?

\_\_\_ YES or \_\_\_ NO

#### Mares/Broodmares:

If mares **are not selling in foal**, or **not currently being bred**, we do NOT do ultrasounds as part of the exam. If you would like to verify breeding soundness on a horse without an ultrasound, you will need to arrange this with a veterinarian PRIOR to bidding.

**For mares in foal or currently being bred:** Ultrasound videos and an additional pregnancy exam statement will be in the dropbox **by sale day**. They are taken 2-5 days before sale time in order to give you a **CURRENT** pregnancy status and reproductive ultrasound view, so **please be patient** when waiting on this information to be uploaded to the dropbox.
