

SHIP 2 SHORE
CORROSION PREVENTIVE SOLUTIONS

AUTOMOTIVE RUST PROOFING

RECOMMENDED USES

- Fleet vehicles
- Trucks and trailers
- Heavy equipment
- Automobiles
- Rail cars
- Agricultural equipment
- Battery terminals
- Electrical connectors
- Engine bays

LONG LASTING WET FILM TECHNOLOGY THAT POLAR BONDS TO ALL METAL SURFACES AND STOPS RUST IN ITS TRACKS

ADVANTAGES

- Easy-to-apply
- Works on dissimilar metals
- Resists splash and spray
- Penetrates under existing rust and de-scales
- Non-tacky coating does not attract dirt and debris
- Electrically non-conductive; stops electrolysis
- Rubber compatible to ASTM D471 standards
- Wide range of operating temperatures
- Self-healing film creeps into scratches
- No curing time
- Environmentally friendly

*Tough on rust.
Gentle on the environment.*

S2S Automotive Rust Proofing is formulated to protect vehicles of all types from rust and corrosion. It instantly bonds to metal, like a magnet to steel, displacing water and oxygen and shutting down rust cells.

S2S Automotive Rust Proofing is a superior lubricant and penetrant, offering several advantages. It creeps into hard to reach areas, is an excellent anti-seize and penetrates under existing rust to act as a descaler. S2S Automotive Rust Proofing is electrically non-conductive, halts electrolysis and prevents corrosion caused by dissimilar metals.

For more than 30 years, S2S corrosion preventive solutions have been successfully protecting marine vessels and heavy equipment in the harshest environments. S2S Automotive Rust Proofing is the ultimate rust inhibitor for cars, trucks and trailers. It is easy-to-apply with an airless sprayer, brush or roller and there is no curing time. S2S is safe on the environment, non-toxic and non-hazardous.

RELIABLE PROTECTION FOR VEHICLES FROM EXTREME WEATHER, ROAD SALT AND SAND
