

The world around us is changing rapidly than ever before. The pace of this change has only accelerated further by the changing regulatory environment around sustainability, advancing technology and a constant drive of the companies to remain competitive and deliver greater value to its customers and shareholders. In this dynamic environment, where change is the only constant, the companies from the energy sector are extremely challenged to coexist and thrive with the changing face of the world around them and the rising aspirations of its investors for greater returns on their investments.

SustEN– A bimonthly digital magazine targets to provide insights and opinions from the leaders of the energy and the environment industry. Our efforts, which are deeply rooted in our vision of being the most admired source of information enabling socio-economic change in the energy sector, is to build the bridge between profitability and environment sustainability. Towards this end, we will bring to you the stories, innovations and insights from some brilliant minds from across the industry.

We have designed a unique theme calendar which will cater to the needs of diverse set of audiences – from CXOs of large multinational corporates to students aspiring to make their careers in energy and environment sector. Following are the groups we are targeting to reach:

Other than information and insights about the energy and environment sector, SustEN will also carry important features and technical papers on various upstream and downstream sectors. Other focus industries are given below:

While we have clarity in term of our focus industries and audience, we aim to create content that is sector and region agnostic and caters to the needs of all.

We look forward to partnering with you.
