

****OUR NEIGHBORHOOD SPOTTED WILDLIFE ON SEVERAL OCCASIONS****

Some wildlife include: RATS, RACOONS, RABBITS & POSSUMS

Visit our website frequently to stay up dated on the latest news in our neighborhood: CCTWatch.org

WHAT CAN WE DO?????

- 1) Cut off their FOOD SUPPLY
- 2) Lay out RAT BAIT STATIONS
- 3) Barricade NESTING AREAS

1) Cut off their FOOD SUPPLY

- No birdfeeders -No littering -Pick up trash
- Monitor vegetable gardens & lay down a protective barrier like Repels-All or Critter Ridder
- Pick up dog poop as poop is a food source for some animals like RATS
- Secure your garbage bin(s) with a heavy brick or a bungee cord

2) Lay out RAT BAIT STATIONS

Rat bait stations are boxes that house rat poison. Rats go in the stations, eat the poison & die later most likely in the sewer. Lay out 2-3 per house.

WHERE TO GET RAT BAIT STATIONS???

- 1) **DO IT YOURSELF** - Go to a hardware store, purchase rat bait stations & bait
- 2) **THE DEPARTMENT OF HEALTH CAN DO IT FOR YOU CALL 716-961-6800**
 - the home owner will start a "Service Request"
 - the Dept of Health will come out & lay the baited stations for you
 - the Dept of Health will also bait your garage
 - **THIS IS A FREE SERVICE**

****To be effective, rat bait stations must always have poison in them so check them often.**

****The Department of Health will check & fill your bait stations as often as you ask.**

3) Barricade NESTING AREAS - Block off openings under porches & decks
