

YOUR TREATMENT JOURNEY

"Unlock the power of renewal within you,
where science meets the future of healing."

1

INITIAL EXPLORATORY CALL

Schedule an exploratory call with one of our health ambassadors. During this call, we'll understand your situation, answer your questions, and determine if you are a potential candidate for stem cell therapy.

2

COMPLETING INTAKE FORMS

After your initial call, you'll receive intake forms that need to be filled out prior to your consultation. These forms provide Dr. Leonardo Gonzalez with essential information, ensuring a productive telemedicine consultation.

3

CONSULTATION WITH DR. GONZALEZ

During your telemedicine consultation, Dr. Gonzalez will discuss your medical history and current health issues. He will use this information to draft a personalized treatment plan, specifying the amount and type of mesenchymal stem cells (MSCs) needed.

4

REVIEW YOUR TREATMENT PLAN

Once your treatment plan is ready, you'll have another call with our health ambassador to go over the plan, clarify any doubts, and prepare for the next steps.

5

BOOKING AND PREPARING FOR YOUR TREATMENT

Book your treatment date. Dr. Gonzalez, based in Florida, travels to Bogotá, Colombia twice a month to perform treatments. Remember, the full treatment journey, including pre and post procedures, typically spans 3-4 days plus travel time. A 30% downpayment is required upon booking.

YOUR TREATMENT JOURNEY

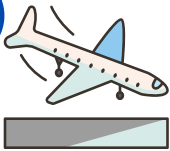

6

PRE-TREATMENT PREPARATION

You will receive a comprehensive meal plan and preparations guide, including hotel recommendations. One week before the procedure, our health advocate will contact you to go over any last-minute questions and provide details like daily schedules, transportation (with included driver details), etc.

7

ARRIVAL IN BOGOTÁ, COLOMBIA

Upon arriving in Bogotá, you will be picked up by our driver and taken to your hotel.

8

TREATMENT DAYS

Your treatment begins with a preoperative day including sessions in a hyperbaric chamber, neurohacking, and IV therapy. The following days will focus on the stem cell procedures, tailored to your specific needs.

9

POST-OPERATIVE CARE

After the last procedure, Dr. Gonzalez will personally check on your progress to ensure you are responding well to the treatment. Post-treatment care is crucial for your recovery.

10

RETURNING HOME

You should be cleared to fly back home the day after your post-op check-up, fully supported by our team throughout your journey back to health.

11

SCHEDULED FOLLOW-UPS

Continue your healing journey with follow-up appointments via telehealth with Dr. Gonzalez. These are set at 2 weeks, 1 month, 3 months, and 6 months post-treatment to monitor your progress and optimize your recovery.
