

# The Purpose and Benefits Provided by Inspecting your industries

- Knowledge of the various Industrial facilities
- Compliance with Federal & State regulations
- Understand the IU's waste impact to the POTW
  - Response to emergencies

### **Inspection Frequency**

40 CFR 403.8 (f) (2) (v)

Significant Industrial User (SIU)s must be inspected at least once a year.

- Exception: "Middle Tier" SIU (inspect once every 2 years)
- Exception: Non-Significant Categorical Industrial Users (no inspection required)
- Exception: Significant changes (inspection ASAP)
- Exception: Investigation for violations (inspection ASAP)

Types of Pretreatment Inspections

Screening or Certificate of Occupancy (CO) Inspection

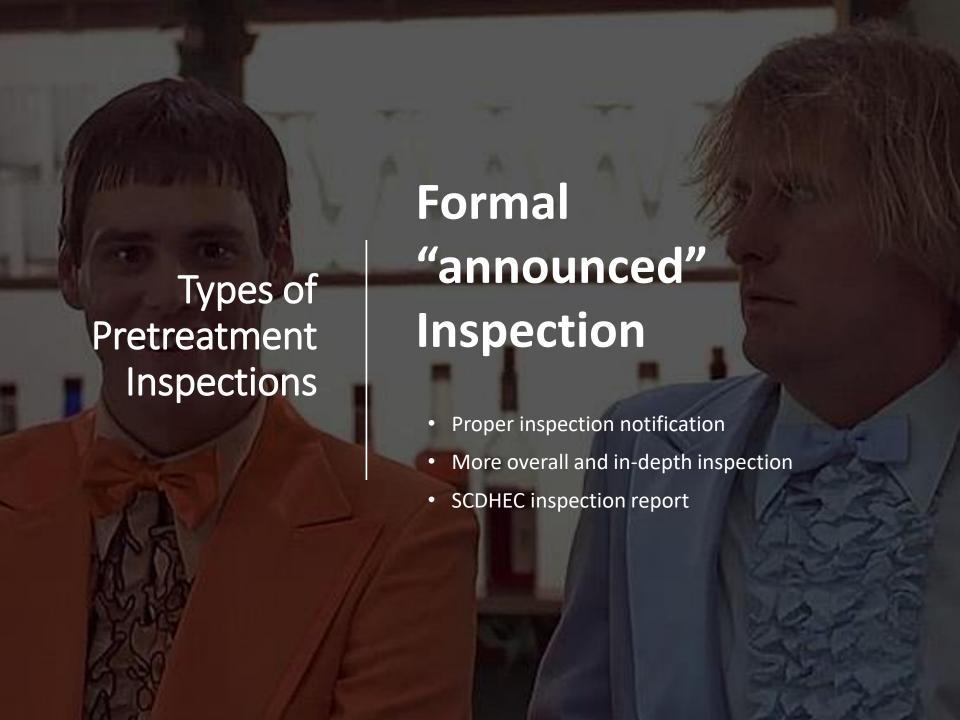

New SIU/Pre-Permit Inspection

**Routine Annual Inspection** 

Compliance [Demand] Inspection

**SIU Closure Inspection** 

Types of Pretreatment Inspections

# Informal "unannounced" Inspection

- Site specific inspection
- Investigational inspection
- POTW inspection report
- Sample grab parameters (pH, VOC's, ext.)

### **Inspection Preparation**

**Review Your Files Before inspection** 

- Permit/Applications
- Inspection notes
- Site & process flow diagrams
- Compliance schedules
- Plans
- Analytical data
- Water use/billing records
- POTW sewer maps
- Categorical regulations
- Enforcement actions taken
- POTW problems
- Compliance status
- Check list of information required

### **Entry Procedures**

- Signing IU entry waiver (READ BEFORE SIGNING)
- Delays (within reasonable time frame)
- Safety issues

Site specific and universal safety (PPE, dangerous areas)

### Inspection Questionnaire

#### **General facility information**

- POTW representatives
- Facility changes
- Federal Category
- Date of previous inspection
- Hazardous waste management
- SNC or Compliance schedules
- Process change, POTW notified
- Pretreatment system
- Upgrades to Pretreatment system
- Operator of proper grade

### Inspection Questionnaire

#### **Slug Discharge Evaluation**

- Floor drains
- Continuous flow or Batch
- Containment description
- Batch flow equalization
- Spill control equipment
- Bypass lines
- HAZARDOUS WASTE
- Notification statement
- Slug control plan
- Toxic Organic Management Plan
- TOMP in compliance

#### B. Slug Discharge Potential Evaluation

				Y	N	N/A
	ı.		Any floor drains in any mfg. or storage areas.			
	if	s	o, where do they discharge	-		
	2. if		Facility releases Continuous or Batch discharge atch, how many discharges per week			
	3.		Are there appropriate containment devices in mfg. and chemical storage areas to prevent slug loads.			
	if	s	o, briefly describe			
	4.		Are all batch discharges subject to flow equalization prior to discharge to the POTW.			
	5.		Are all containment structures in good operating condition. $ \\$			
	6. if	уe	Does the IU have on-site spill containment equip.			
	7. if		Does industry practice a spill containment program es, frequency of drills			
	8.		Any bypass lines around the IU treatment facility.			
<u>.</u>	9.		Any hazardous waste on site.			
3			If yes, are all containers properly labeled.			
	10.		Is the IU aware of its responsibility to notify the POTW, DHEC and EPA of any hazardous waste discharge			
	11.		Does the IU have a slug discharge control plan.			
	12.		Does the IU have a toxic organic management plan.			
	13.		Are preventative measures sufficient in order to maintain compliance with the approved TOMP.			
	COM	ME	INTS:			

#### Slug Control Plan—40 CFR 403.8 (f) (2) (vi)

Evaluate need for a slug discharge control plan

- For existing SIUs at least once per year
- Adopted streamlining rule one time evaluation or re-evaluate if conditions change
- New SIUs must be evaluated within one year of designation as SIU

### Inspection Questionnaire

#### **Sampling information/Flow Measurement**

- Sample point same as permit
- Sample point condition accessible
- Flow meter type & operational
- Flow meter CAIBRATION date
- Flow check & frequency
- Flow records
- IU deficiencies
- Need a SLUG control plan
- Previous deficiencies
- COMMENTS
- Signatures & date

	C. Sampling Location/Flow Measurement Inspection			
		Y	N	N/A
1.	Is sampling performed at location in permit.			
2.	Is sampling location accessible and in good condition.			
3.	Is flow measuring equipment operational. Type of flow meter			
4.	Is flow meter calibrated annually by certified tech Date of last calibration			
5.	Is flow meter accuracy checked regularly. if yes, indicate frequency			
6.	Are flow records properly maintained.	1		
	SECTION IVCLOSING CONFERENCE/COMMENTS			
	,	Y	N	N/A
1.	Has IU representative been notified of deficiencies			
2.	If a slug discharge control plan is not in place, should one be implemented by the IU.			
3.	Have noted deficiencies from previous inspection been corrected by the IU.

### Walkthrough

Walkthroughs can be preformed prior to asking questions

- Housekeeping
- Labels & containment
- Dilution sources
- Piping configurations
- Monitoring point location/accessibility and safe
- Condition of monitoring point and pretreatment equipment

### Friendly Reminders

- •Make sure all records are for inspection time frame January 01, 2018 to December 31, 2018
- •Follow-Up With IU Before Leaving
- Comment on housekeeping and/or compliance issues
- Identify potential improvement areas
- Allow IU to ask questions
- •Show a positive, ethical and controlled demeanor
- Make sure report is signed and dated
- Take good notes
- Include staff & other team members
- •CLARIFY ALL INFORMATION & QUESTIONS (Before departure)
- •Ask about facility updates, production increase or decrease, is the IU's facility expanding or downsizing?

**ASK QUESTIONS!** 

### Areas to Improve

- EPA or State basic inspector training courses
- Purchase Pretreatment inspection material
- Ask more questions, learn more about the facility your inspecting.
- Volunteer for joint agencies inspection
