CLEANING WITH Kastex

Cleaning with Care

- Use water or a gentle, mild soap for cleaning.
- Avoid harsh chemicals, bleach, or acidic cleaners, as they can damage the surface.
- Do not use abrasive pads or tools, which can scratch or dull the finish.

Cleaning Methods

- Choose soft, non-abrasive cloths, such as microfiber.
- Prepare a gentle solution: mix warm water with a small amount of mild, bleach-free soap.
- Clean gently: wipe in circular motions to remove dust, dirt, or grease.
- For tough stains, use a plaster-safe product that is bleach-free wipe, applied gently without scrubbing, following the product instructions.

Everyday Care

- Wipe spills to prevent staining.
- Keep wet objects off plastered surfaces.
- Dust lightly with a soft cloth to maintain the surface's appearance.
- Treat as if it is natural stone.

Repairs and Restoration

Kastex finishes are resilient, but minor chips or scratches may happen over time. For repairs:

- Consult a certified Kastex applicator.
- Our experts can restore your plaster to its original condition using the right materials and techniques.

Important Reminders:

- Never use bleach or highly acidic products.
- Avoid anything rough that could scratch or damage the surface
