

GOT MICE?

Then you need...

The Lost Companion's Barnyard Buddies Program

TLC sometimes rescues cats that would not be happy living indoors, but would make wonderful barnyard buddies!

Our Barnyard Buddies program was created to save feral or semi-feral cats from a life of hunger on the streets or from being destroyed. These natural mousers will stop expensive grain and feed from destruction without using costly and harmful chemicals!

We have a Barnyard Buddy to fit anyone's needs.

These are cats that will thrive in an outdoor (or indoor/outdoor) environment, such as backyards, farms, hobby farms, horse stables, fire stations, garden nurseries, body shops, garages, warehouses, ...the list goes on and on!

Our cats are spayed/neutered and vaccinated for distemper and rabies prior to moving to their new outdoor homes.

These Barnyard Buddies don't charge for their services as your official rodent control experts. Just provide them with daily food, water, shelter and veterinary care as needed.

Guidance and help will be provided during the relocation process.

**To adopt a Barnyard Buddy (or two),
