

## **Fiery Pro Vehicle Outline for Automotive Wraps Adds Popular 2024 American and European Vehicle Models**

**Fremont, California. February 29, 2024.** [Fiery, LLC](#), the largest independent provider of digital front ends (DFEs) and workflow software, has expanded its vehicle wrap template service to include the most in-demand 2024 vehicle models. Pro Vehicle Outline (PVO) now features the latest 2024 car template collection from a diverse range of American and European manufacturers, including Ford, General Motors, Tesla, Volkswagen, Peugeot, Mercedes-Benz, Renault and Dacia, among others.

"The vehicle wrap industry is experiencing a boom across the globe, and PVO makes it easier for designers and installers to create high-quality, customized wraps and branding for the most popular 2024 models of cars, trucks, SUVs, trailers, vans, and specialty vehicles," said John Henze, Vice President, Sales and Marketing, Fiery. "By offering the most extensive collection of templates and tools to automate business operations, PVO is an indispensable production tool that helps customers grow their businesses while driving profitability."

PVO templates have been integral to the vehicle graphics industry for over 30 years. Used to design, present, produce, and install graphics that include full and partial wraps, lettering, decals, and striping, designers and installers around the world rely on the precision of the hand-measured, carefully photographed, and meticulously created templates for all their projects. PVO also offers tools to help streamline vehicle wrap quotes and projects. PVO WrapUP is a dynamic software service designed to simplify the creation of customer-ready price quotes and provide accurate vehicle square footage calculations for wraps.

"Each year, we expand PVO's template collection with new makes and models and now have a library of 19,500 templates. The addition of vehicles from manufacturers like Volkswagen, Peugeot, Renault, and others demonstrates our commitment to meeting the specific needs of the European automotive wrap industry," continues Henze.

"I started using Pro Vehicle Outlines in 2005 and have not looked back. PVO templates stand out for their unmatched detail and accuracy, crucial in an industry where even minor errors can lead to significant financial setbacks. No other template service I've seen meets PVO's precision. PVO templates pay for themselves instantly," said Daniel P. Nava, owner of Travel Wraps Graphics and [IBOW Training](#).

"I integrate PVO into my vehicle wrap design school with full assurance that my students benefit from top-quality templates. The expansion of PVO into the European market allows more markets to experience the same excellence in vehicle wrap design that I have enjoyed for many years," continued Nava.

Fiery will showcase PVO at ISA International Sign Expo 2024 in booth 1513, April 10-12 in Orlando, Florida.
