

HILL TOP VANITY TAG TEMPLATE

Finished stitched count should be 97 stitches top to bottom at tallest point and 54 stitches from side to side at widest point. This stitch count includes extra rows to ensure that no unstitched canvas is visible. (The extra rows will not be visible.) ***Please do not stitch more than the specified number of stitches.*** Print out our template, cut out the center and lay it over your stitched design to be sure you have no unstitched canvas visible.

IMPORTANT: When printing out the templates check the print settings and make sure the scale is set to print "Actual Size" or 100% so that the template prints out in the correct size.
