

Ozonated Oils by PurO3

What is ozone? Ozone (O₃) is a highly reactive gas composed of three oxygen atoms. It is both a natural and a man-made product. In alternative medicine, practitioners of ozone therapy use gas or liquid forms of ozone to treat medical conditions and as a topical disinfectant. It has a powerful anti-inflammatory effect on tissues. Some refer to it as “active oxygen.”

The PurO3 Story

“Over 100 years ago, ozonated olive oil was approved by the surgeon general to be used for healing purposes. Nikola Tesla was among the first to sell the oil in pharmacies under the name Glycozone. We are a family-owned business dedicated to providing effective, all-natural products that promote overall health, longevity, and vitality. We offer premium, ozone-infused products that combine the healing power of nature to deliver superior wellness solutions that hydrate, heal, and protect. All of our products are made in our lab in Arkansas, stored refrigerated, and shipped worldwide.”

My PurO3 Story

Robert Rowen MD has been using, and teaching, the use of ozone both as an injection and IV for decades. I read an article of his titled **Can You Treat Your Own Severe Osteoarthritic Joints at Home with Ozone Absent Injection? Amazing Report!** I know a number of folks who struggle with joint pain, so I was very curious. In the study, **all** of the patients using ozonated oil showed “significant pain relief” by simply using the oil **topically** twice a day for 2 months. I ordered some samples and started playing with them.

I have always struggled with rashes. The answer from the dermatologist for help was ridiculous. He offered a tube of new prescription cream that insurance did not cover. That would be \$1,000 for an 8-ounce tube. I tried samples and found that it was only marginally helpful. The other option was an injectable biologic called Dupixent that would have been covered by insurance, but costs \$10,000 per month, and it would alter my immune system. Not interested. I started using the oils on my face and neck. Yes! For literally pennies a day, my rash and peeling skin issues resolved within three days!

A couple of days later, I started making supper. I was using a mandolin or kitchen slicer. And yes, I sliced off the tips of two of my fingers. It took 90 minutes for them to stop bleeding. I was anticipating at least a week to 10 days before I could even use them again. The next day, I started dipping them into my sample pots of ozone oil. One week later, you could still see a little divot, but they were totally healed. Still a little sensitive, but totally healed. I was just shocked. Then I started sharing my little sample pots, and placed a big order.

Here are other PurO3 Stories

Stacey got overnight relief from a bad rash she picked up in the garden. Cora also had painful, peeling skin on her face. Within two days, it all cleared up. Linda fell on her hands, and generally has very painful thumb joints. Twenty-four hours and her hands were better!! Janie had an itchy spot just inside her ear that was driving her nuts. It would often bleed then scab over. “I tried everything with no relief.” She used ozonated hemp oil and in just a few days it was totally healed and does not itch any more.

For Carol, it hurt to talk due to inflammation of her vagus nerve. She consulted several physicians and endured medical procedures to try to get to the bottom of it. The only thing they came up with was that she had “silent GERD” which is gastroesophageal reflux disease. In other words, they said stomach acid splashing up on her vocal cords was causing the pain. They prescribed stomach acid reducing medicine. Stuff like that infuriates me. We need stomach acid, and they were just guessing. Fortunately, Carol didn’t take the medicine. She met with me right after I got my sample pots. I gave her one of the sunflower oils and told her to just apply a small amount twice a day to each side of her neck. At the one week point she said, “I think we might have a minor

miracle going on here.” Two weeks in she reported, “I’m singing in church again!” and a month later she said that her voice just continues to get better.

As for the couple of folks who tried topical ozone for knee pain, the results were not as excellent as we had hoped. It’s the rash, injury and nerve pain testimonies that are the most abundant.

Then I tried their ozonated tooth cleaning powder and oil pulling solution and my trouble with a sore tooth and bleeding gums disappeared. The tooth powder has a lovely taste and texture.

PurO3 also has oral ozone capsules. Sherri has always struggled with high blood pressure issues. She starts her story with topical success. “I want to start out by saying that generally I’m a skeptic with new products until I see it work for myself when it comes to supplements, etc. With the O3 products, I was very hopeful but didn’t expect miracles - which you mentioned it isn’t. However, I’m thinking for myself it is a miracle!

“With the jar, I’ve put it on my chest and sinuses and today I can finally taste and smell and the congestion is almost completely gone. That’s great in itself, but the capsules I’m labeling the miracle.

“I’ve been having issues with my blood pressure with all of the crap I’ve been dealing with this year. No matter what I did, I couldn’t get it down into the “normal” range. I’ve been taking the O3 capsules for a few days now and I have some results:

“BP Prior to Taking O3 tabs (random times / various days): Average 138 / 80.8
Taking O3 capsules (random times / various days): Average 120.25 / 70.75

“The change showed up immediately. My BP dropped an average of 17.75 points on the top and 10.05 on the bottom! I can’t make that up.” I just checked in with her again, so she’s been using the oral ozone capsules for about a month. “My blood pressure has been great! I had a couple of tough days (emotionally - which skewed it a bit), but the average is 122/69. Most days it hangs around 114 / 68. I’m still loving the ozonated oils!”

As with all the supplements I offer, always contact me first before going to Amazon. Typically, I can get them for you at a better price, and then you know exactly what you’re getting. There is a lot of fraud out there. The PurO3 website

www.PurO3.com has other interesting products and I would be happy to chat with you about them. I am excited to share these products with you!

All products on the PurO3 website are available, but not all of them are stocked. Special order requests are always considered!

90 caps Ozone Oil
Hemp (MSRP \$44.95) \$35
Olive (MSRP \$39.95) \$30

The oils are listed by Strength and Absorption. Strength refers to the amount of ozone in the oil. The higher the Strength, the stronger the effect of the “active oxygen” because there is more of it. The Strength can also refer to the unique ozone smell, which is problematic for some people. Also, a very high Strength may not be suitable for sensitive skin.” I consider myself to have sensitive skin. I started with Hemp oil on my neck, the highest Strength, and then had to drop to Olive oil. I have one client who loves the Coconut oil for her face. Notice that the Strength is low, but Absorption is high. However, I sell more Hemp oil than any of the others. My favorite is Olive, which is balanced. It’s the Olive oil that healed some very suspicious lesions on my face. Probably skin cancer, but I didn’t go to a dermatologist because I didn’t want surgery or steroids. You might have to play with these a bit.

Ozone-infused Organic Oils

Our limited ingredient products contain only fresh, organic oils for the very best in natural skin and body care.

STRENGTH: ●○○
ABSORPTION: ●●●

OZONE-INFUSED ORGANIC COCONUT

Organic coconut oil infused with O3 creates an oxygen-rich moisturizer. Perfect for daily use, massages, or smoothing the look of dimpled skin. Gentle enough for sensitive skin.

STRENGTH: ●○○

Ozone-infused Oil Oral Health

OZONE-INFUSED TOOTH & GUM SUPPORT Peppermint | Peppermint Stevia | Cherry Stevia

Formulated from fully ozone-infused organic olive oil and organic hemp oil with a choice of flavors. There are no harmful preservatives or fluoride. Ozone-infused oils are used for a variety of gum and tooth issues. Ozone is being used more and more often for oral care. It is now easier to add ozone to your dental routine. Peppermint and Cherry/Stevia also available in one ounce tubes.

OZONE-INFUSED OIL PULLING SOLUTION

Designed to enhance Ayurvedic oil pulling practices with the power of ozonation. Oil pulling is considered important for extracting unwanted microorganisms and toxins from the mouth in order to improve general wellbeing and oral health. Our solution combines ozone-infused organic coconut oil with organic sesame, sunflower and peppermint essential oils.

"I've been using this for 4 months now along with the tooth and gum support and tooth powder. This stuff is amazing!! Prevented a root canal or extraction from being done." - Michelle H.

Supplemental Wellness clients love the Tooth Cleaning Powder. Use it in place of other toothpaste.

2 oz Tooth Cleaning Powder (MSRP \$29.95) \$22

Do you know anything about oil pulling? It is an ancient art and what people used to do to address oral health issues. PurO3 has this delightful ozone-infused peppermint oil. The most important thing to know is when you're done "pulling," make sure you spit it out into a waste basket – not the sink or toilet. It can clog your pipes, but leaves you with a fresh, clean mouth.

8 oz Oil Pulling Solution (MSRP \$34.95) \$30

For folks with problematic teeth, Tooth & Gum Support product can be used. It's a gel that can be used on individual teeth, or can be combined with the Tooth Cleaning Powder. Special order only.

1 oz tube peppermint or cherry (MSRP \$17.95) \$12.00

2 oz jar peppermint, sweet mint or cherry (MSRP \$29.95) \$15.00

OZONE-INFUSED TOOTH CLEANING POWDER Sweet Mint

Finally, there's a better way to keep your teeth clean with the power of ozone. Ozone-infused Tooth Cleaning Powder can help keep your mouth healthy and happy with all-natural ingredients. No fluoride, no artificial sweeteners, and no artificial additives. We use a proprietary, heat-free process to convert ozone-infused oil into a powdered form. In this form, the ozone-infused oil mixes better with other ingredients that are essential for cleaning your teeth.

Adding ozone-infused oils to tooth cleaning products creates a more robust antimicrobial effect than traditional toothpastes. Powders provide better abrasion to knock contaminants from the surface of your teeth and gums. It's an ideal option for those who want a natural option that is safe and effective.
