Details

Kinesys Libra WiFi Spec Sheet

Key Features

- Wireless distributor for broadcasting Libra Cell data to Libra Watch software

- Compatible with all Kinesys systems via Libra Pro

- Can be plugged directly into DigiHoist

Description

The Libra WiFi is a wireless distributor used for broadcasting Libra Cell data to Libra Watch software.

A key advantage is its unique design, perfect for using at any live entertainment event. The aerial can be easily mounted onto any truss, maximising the chances of generating the best signal without any limitations.

Libra WiFi is compatible with all Kinesys systems and can be plugged into a DigiHoist to broadcast Libra Cell data without the need of a Libra Pro. Libra Pro and DigiHoist can be connected to an Ethernet network thereby allowing Libra WiFi to have access to all the load data in the system.

Wireless networks can be unpredictable under live show conditions – it is recommended to use a wired network connection whenever possible if load monitoring is required during a performance.

Specifications

- Built in firewall ensures faster, safer and more secure load data network

- Ethernet connection (PoE) from Libra Pro or DigiHoist provides power and data to Libra WiFi

- Supports IEEE 802.11 b/g/n (2.4 GHz)

- IEEE 802.11 a/n (5 GHz) option available

Still Have Questions?

If you have any questions, please contact us (http://www.taittowers.com/contact/). We look forward to hearing from you soon!
