

BG Precision Machine

Capability Statement

BG Precision Machine, Inc. provides strategic machining and component manufacturing services to the Federal market.

As a minority owned business, BG Precision is committed to excellence by creating innovative and flexible solutions for our Federal clients.

What sets Critical Components apart

- Our People, cross trained.
- Strict Quality-Based Processes
- Varied 4 and 5 Axis Capabilities
- Dedicated Contract Administration
- ISO 9001 / AS 9100 Certification facility

CORE CAPABILITIES

Our experts and business professionals have years of experience implementing solutions in the areas of:

- Reverse Engineering
- Manufacturing to Extreme Geometric Tolerances
- Documented Inspection Processes

Manufacturing

By incorporating industry best practices and years of success in complex manufacturing for the Oil & Gas industry, BG Precision is equipped to meet the challenging demands of Federal clients. We can ensure contract deliverables are delivered correct and on time.

Documented Inspection Processes

BG Precision's core strengths are producing complex quality products. This is achieved by strict quality control and inspection processes. These processes are verified and audited through 3rd party entities. Our Continuous Improvement cycle ensures we raise the bar after every contract.
