

Quality Standards

ISO 9001:2015 is the most comprehensive level of the ISO 9000:2000 series, covering everything from design and development through production and distribution of products and services. The overall objective is to establish a system to improve product quality and reliability.

Standardized Test Methods Committee, is a global agency that was enacted to develop rigorous standardized test methods for the OEM-compatible and remanufactured printer cartridge industry. The standards defined by STMC help set performance specifications that make aftermarket remanufactured and compatible toner cartridges equal to or better than OEM (Original Equipment Manufacturer) toner cartridges.

At Imaging Logistics, we offer a 100% guarantee for your toner cartridges as well as your printer. We stand by the quality of our products and guarantee them for one year from the date of purchase. We also offer a 30-day money-back guarantee.

The ISO 19798 standard is a method for testing and calculation of the average page yield test for color toner cartridges.

The ISO 19752 is a is a page yield test for monochrome laser printer cartridges. Both are tested on multiple printers with a standard test page under specific environmental conditions and printer settings.

ISO 14001 is the international specification for an environmental management system (EMS). It specifies requirements for establishing an environmental policy, determining environmental aspects and impacts of products/activities/services, planning environmental objectives and measurable targets, implementation and operation of programs to meet objectives and targets, checking and corrective action and management review.
