LESS fertilizer is MORE fertilizer with ENHANCE

Get more out of your fertilizer, and don’t get it by applying more, get it by increasing its efficiency through the use of natural carbon. Carbon is nature’s nutrient storage bank; why not use it as yours too!

Enhance is a balanced humic-acid based product designed to improve efficiency and nutrient availability.

Enhance contains complex carbon, trace minerals, natural surfactants, and all natural growth stimulants to complement your fertilizer program.

General Information
- Improves nutrient efficiency
- Gives available nitrogen a grounding point to reduce losses
- Promotes healthy microbial growth
- Increases nutrient availability
- Aids in developing soil structure
- Aids in water penetration
- Great with all foliar and pre-plant fertilizers

Application Rates
- Application rates dependent upon soil/tissue sampling
- Typical application rate of 1 qt. - 1gal. per acre
- Typically applied no less than 3 times throughout the growing season

Application Tips
- Apply via chemigation, fertigation, or foliar broadcast spray.
- Apply with starter fertilizer
- Apply as soil drench
