Are You Ready to Put a High Tech Fertilizer Into Your Program?

Over application of fertilizer to account for volatilization losses is a thing of the past with TRIPLE-6. Formulated using a proprietary sulfur binding technology, there’s no need to account for losses, because TRIPLE-6 is already plant acceptable, and you only apply what you NEED!

TRIPLE-6 contains all three macro & secondary macro-nutrients. Combining plant readily accessible calcium, magnesium, and sulfur allows a higher efficiency use of nitrogen, phosphorous, and potassium.

**General Information**

- Incomparable Efficiency
- Supplies transport nutrients to aid in overall plant utilization
- Instantly acceptable
- Consists of the nitrate form of nitrogen, the most acceptable form for plants
- Rapid greening
- Promotes stronger more stress tolerant crops
- **Unrivaled Cost Effectiveness**
- When combined with our micronutrient product **Ultra-Trace** the plant is provided a perfect fertilizer package

**Application Rates**

- Application rates dependent upon soil/tissue sampling
- Typical application rate of 1 qt. / acre
- Typically applied no less than 3 times throughout the growing season

**Application Tips**

- Apply via chemigation, fertigation, or foliar broadcast spray.
- Avoid mixing with glyphosate, if combining TRIPLE-6 with ULTRA-TRACE do not mix with glyphosate or heavy sulfate/sulfate based products.

5 Gallons, Liquid • Net Wt. 53.4 Lbs
10.68 Lbs. Per Gal. @ 68°F.
