## CLEANING AND MAINTENANCE | LIMPIEZA Y MANTENIMIENTO

**LIMPIEZA FINAL DE OBRA**  
Después de la colocación es fundamental realizar una buena limpieza para eliminar residuos de junta y en general suciedad de la obra.  
Para esta operación es aconsejable el empleo de un detergente de acción ligeramente ácida que no despidan humos tóxicos y respete las juntas, el material y el usuario, como Filadeterdek.

**MANTENIMIENTO**  
Para un buen mantenimiento del pavimento se aconseja el empleo de un detergente neutro de alto poder limpiador como Filacleaner. En los casos de suciedad orgánica intensa y acumulada en el tiempo, grasas, etc. se aconseja la utilización extraordinaria de un detergente de tipo desengrasante como el Fila PS/87.

**CLEANING ALTER LAYING**  
*Cleaning after laying is of fundamental importance for all subsequent procedures and for care operations. The initial cleaning process requires to eliminate all residues from laying process (mortar, adhesive, paint, building-site, dirt of various kinds), and removes any surface waste.*  
*For this operation, MYKONOS recommends Deterdek, the acid descaler that does not generate harmful fumes. It removes building-site dirt- mortar, grout and hard deposits of various kinds.*

**MAINTENANCE**  
*For routine care, we recommend the use of Filacleaner, that does not damage the surface. It is diluted depending on the level of dirt. When highly diluted, it does not need rinsing. In case of more stubborn dirt, we recommend the use of Filaps/87, the concentrated detergent that can be used as cleaner, degreaser, wax-remover or stain-remover.*
