

MUTANT v2

Native HotEnd Mounting Guide

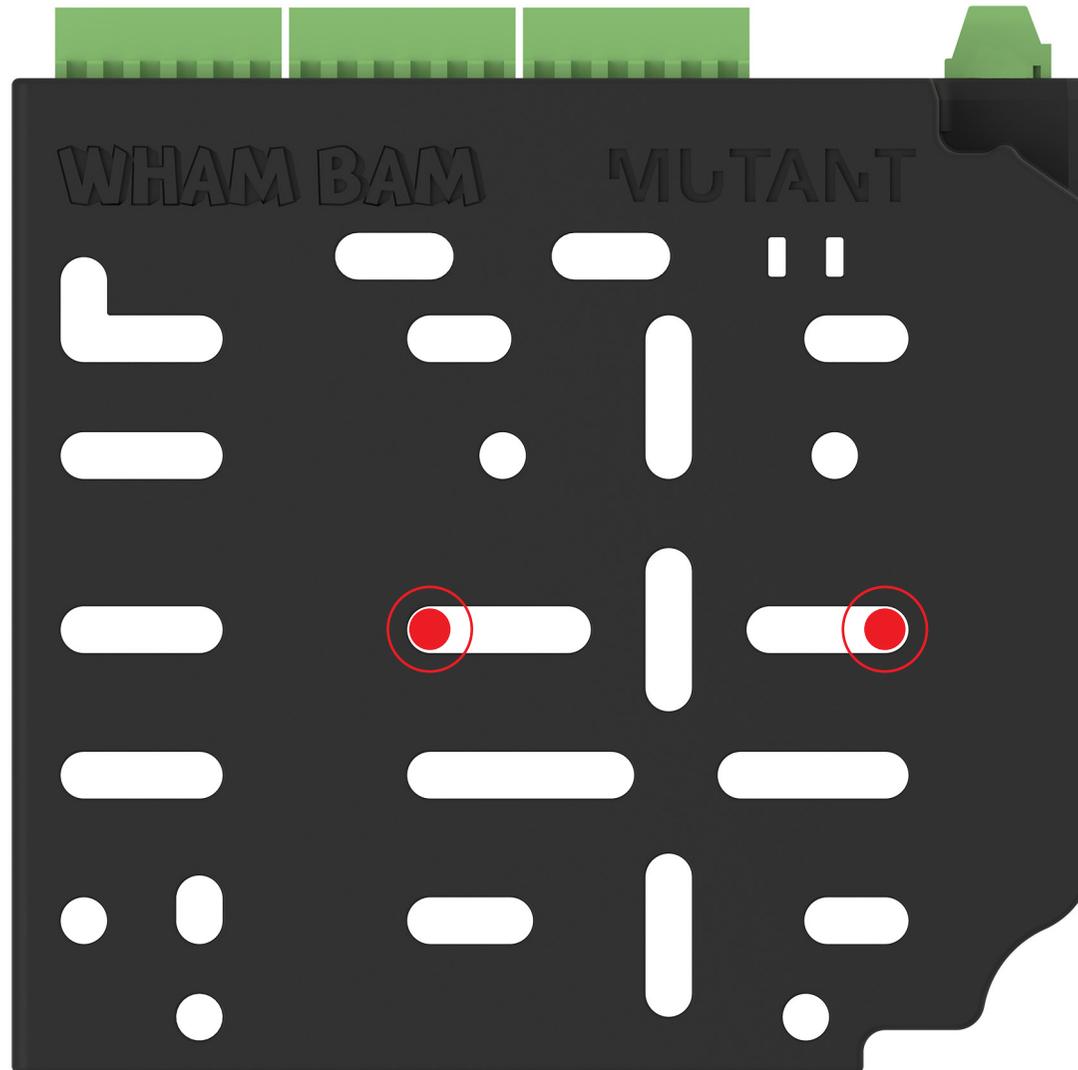

the MUTANT Mobile Plate was designed with an array of slots and holes to best accomodate many hotends and direct drives natively. This guide will help you to find planned locations for mounting, and we are sure there are many other options available.

We also have an extensive and growing list of custom designed hotend and tool mounts available that can be found on our support page: <https://whambamsystems.com/mutant-support>

Index

For Standard MK8 Style HotEnds:	D
Slice Engineering:	B, C, G, L
