

October at Vibini Skin Spa

BOO!

Halloween should be scary -- not waxing!

There are so many benefits to waxing over shaving and what better time to establish a routine than during the colder months when we're all apt to show less skin?

Waxing removes hair from the root versus the shaft, thus taking much more time to grow back and be seen on the surface of your skin. With repeated waxing, the follicle will thin and your hair will grow back finer and more sparse. This makes regrowth less irritating and will reduce ingrown hairs.

Waxing is also a form of exfoliation so repeated waxing in the same area will give you softer, brighter skin. This is one reason why I LOVE underarm waxes. If you're concerned about discoloration, stick to a solid wax routine and you are sure to notice a change.

Get on a regular 3-4 week waxing cycle with our \$10 off body waxing special
