

Indoor Air Quality Services

Air Purification

Improve the air quality in your business with our advanced air purification solutions.

- **HEPA Filters**
- **UV Air Purifiers**
- **Electronic Air Cleaners**
- **And More!**

Air Purification Details:

- **High-Efficiency Filters:** Installation of high-efficiency particulate air (HEPA) filters to capture airborne particles.
- **UV Technology:** Use of ultraviolet (UV) light to kill bacteria, viruses, and mold spores.

Ventilation

Ensure proper ventilation to reduce indoor pollutants and improve air quality.

- **Exhaust Fans**
- **Air Handling Units (AHUs)**
- **Energy Recovery Ventilators (ERVs)**
- **And More!**

Ventilation Details:

- **Balanced Ventilation:** Design and installation of balanced ventilation systems to provide fresh air while maintaining energy efficiency.
- **Advanced Controls:** Integration of advanced controls to optimize ventilation based on occupancy and air quality levels.

Humidity Control

Maintain optimal humidity levels to prevent mold growth and improve comfort.

- **Dehumidifiers**
- **Humidifiers**
- **Humidity Sensors**
- **And More!**

Humidity Control Details:

- **Precision Control:** Installation of humidity control systems with precise sensors to maintain ideal humidity levels.
- **Energy Efficiency:** Use of energy-efficient dehumidifiers and humidifiers to minimize energy consumption.
