PRESS RELEASE - FOR RELEASE ON MONDAY 25TH AUGUST 2025

Abuja, Nigeria – 25 August 2025

Create that Change Development Initiative and The Swiss Embassy commission refurbished Toilets and Libraries in Abuja Schools

Create that Change Development Initiative (CCDI), in partnership with the Swiss Embassy in Nigeria, has commissioned a reconstructed 12-stall toilet facility and two refurbished libraries at LEA Pilot Science Primary School and LEA Phase III Primary School in Gwagwalada, Abuja.

The project — the first phase of CCDI's **Public-School Revival Initiative (PSRI)** — aims to improve hygiene, restore dignity, and create safer, more inclusive learning spaces in public primary schools. It follows CCDI's July 2025 delivery of two 8-stall toilet facilities to LEA Primary School, Kabusa, and LEA Nomadic Primary School, Apo Dutse.

"Access to clean toilets is a basic right, not a luxury," said **Mrs. Sharon Ayeni**, CCDI's Executive Director. "Libraries open doors to knowledge and brighter futures. We are grateful to the **Chargé d' Affairs, Mr Siamak Rouhani and the Swiss Embassy** for joining us in the commissioning of these facilities and for partnering with us to uplift schools that need it most."

The initiative supports Nigeria's **Water, Sanitation, and Hygiene (WASH)** agenda, strengthening the health, dignity, and educational outcomes of children in underserved communities.

About CCDI:

Create that Change Development Initiative is a Nigerian registered non-governmental organization dedicated to transforming the lives of Nigerian children through impactful programs in education, health, and community development.
