PRESS RELEASE FOR IMMEDIATE RELEASE

CCDI in partnership with the Swiss Embassy Break Ground on New Toilet Facility for Abuja Primary School

Abuja, Nigeria – 11 September 2025 – Create that Change Development Initiative (CCDI), in partnership with the Swiss Embassy in Nigeria, has commenced the construction of an eight-stall toilet facility at **LEA Primary School, Shereti, Kabusa**.

This project marks the fourth toilet facility delivered under CCDI's flagship **Public Schools Revival Initiative (PSRI)**, which has already provided three toilet facilities and renovated two libraries in low-income communities. The new facility, scheduled for completion within six weeks, is designed to enhance hygiene, restore dignity, and foster a healthier learning environment—particularly for young girls.

In addition, one of the school's classrooms will be fully renovated and converted into a functional library, further enriching the learning experience for pupils.

Speaking at the groundbreaking, CCDI's Executive Director, **Mrs Sharon Ayeni**, highlighted the importance of the project:

"Access to clean, functional toilets is not a luxury—it is a basic right. This project supports Nigeria's WASH agenda and helps safeguard the health and education of children in underserved communities."

About CCDI:

Create that Change Development Initiative is a Nigerian registered non-governmental organization dedicated to transforming the lives of Nigerian children through impactful programs in education, health, and community development.
