PRESS RELEASE FOR IMMEDIATE RELEASE

Create that Change Development Initiative, in Partnership with the Swiss Embassy in Nigeria, Commissions New Toilet Facilities for Primary Schools in Low-Income Communities in Abuja

Abuja, Nigeria – Thursday, 17th July 2025 – Create that Change Development Initiative (CCDI), in partnership with The Swiss Embassy in Nigeria, is proud to commission two newly constructed 8-stall toilet facilities for boys and girls in public primary schools serving low-income communities in Abuja.

This intervention marks the first phase of the Public-School Revival Initiative (PSRI) — a flagship project aimed at improving learning environments in Nigeria’s public primary schools through critical infrastructure upgrades. There are two more toilet facilities, plus 3 library renovations currently under way.

The commissioned facilities are located at LEA Nomadic Primary School, Apo Dutsen-Garki, and LEA Primary School, Kabusa, and are designed to support improved hygiene, enhance dignity, and foster a safer, healthier learning environment for pupils.

The official commissioning ceremony will take place on Thursday, 17th July 2025, with attendance from representatives of the Swiss Embassy, education authorities, community leaders, and development partners.

“We believe every child deserves a safe and healthy learning environment,” said Mrs. Sharon Ayeni, Executive Director of CCDI. “Access to clean, functional toilets is not a luxury — it is a basic right. We are grateful to His Excellency, The Swiss Ambassador, Mr Patrick Egloff and his team at the Embassy for partnering with us to uplift the schools that need it most.”

This project supports the national agenda on Water, Sanitation, and Hygiene (WASH) in schools, and is a vital step toward safeguarding the health, dignity, and educational outcomes of children in underserved communities.

About CCDI:

Create that Change Development Initiative is a Nigerian registered non-governmental organization dedicated to transforming the lives of Nigerian children through impactful programs in education, health, and community development.
