### Prevent Your Pipes From Freezing

As Temperatures drop, your pipes run the risk of freezing and cracking. Consider these 3 easy things you can do now to prevent frozen pipes.

- Remove, drain, and store outdoor hoses and close outside valves that supply outdoor water. Please wrap or cover your outside faucets with an outdoor foam faucet cover.
- Allow your indoor faucets to drip and open cabinets doors.
- Know where your water meter is located outside in case you need to shut the water off in an emergency.

**We wish you a Happy Holiday!**

**Please stay safe and warm**
